Teacher Education and related Educational Programs

The Teacher Education programs at University of Nevada, Reno strive to be top-flight in teacher, school counselor, and principal preparation with emphasis on competence within the academic discipline. Our programs are comprehensive with particular focus on the new national Council for the Accreditation of Educational Programs (CAEP) and common core standards of excellence, ensuring graduates are contributing significantly to grades pre K -12 student growth through attracting highly motivated and high performing per-service teachers, counselors and leaders, and providing innovative, evolving curricular and field-based experiences. The University of Nevada, Reno College of Education (COEd) embraces the opportunity to continually improve and is also committed to leading the state and region in significantly contributing to economic development and quality of life, particularly through active partnering with public and private organizations and school districts to improve the quality of education in Nevada and to promote college readiness.

Note1: The University of Nevada, Reno College of Education is a recognized leader for its innovative Integrated Elementary Education program; where graduates are certified in elementary education and at least one other high need area (Special Education, Early Childhood Education or English Language Learning). The College of Education is also recognized as an innovative leader for its secondary education programs providing students who have completed a content major (e.g., Math, English, Science) with the opportunity to be certified/licensed to teach through study leading to a graduate certificate or Masters degree.

Note2: The College of Education’s secondary education program in collaboration with the College of Liberal Arts and the College of Science offer programs that lead to degrees in the Liberal Arts and Science majors along with certification for teaching in those discipline areas.

Teacher Education and related educational programs at the University of Nevada, Reno have a strong research focus. They are designed and delivered to incorporate evidenced-based practices to assure best instructional teaching and learning.
