Coeur Mining
Chicago, IL

Company Website: www.coeur.com

Company Overview: Coeur Mining, Inc. is a large primary silver producer with growing gold production with assets in the United States, Mexico, Bolivia, Argentina and Australia. Coeur also owns strategic minority shareholdings in eight silver and gold development companies in North and South America. The Palmarejo mine in Mexico, San Bartolomé mine in Bolivia and Rochester mine in Nevada all produce silver and gold in doré form. Coeur's Kensington gold mine in Alaska produces gold concentrate and the Endeavor mine in Australia produces a concentrate that contains silver. The Company refines its precious metals doré and concentrates using a geographically diverse group of third party smelters and refiners, including clients located in Mexico, Switzerland, Australia, Germany, China and the United States. Coeur markets its doré to creditworthy bullion trading houses, market-makers and members of the London Bullion Market Association, industrial companies and sound financial institutions. The refined metals are sold to end-users for use in electronic circuitry, jewelry, silverware and the pharmaceutical and technology industries.
