

Name of Company & Logo Goes Here

---

## Industry

---

Describe your technology or capabilities. Limit 1 sentence.

- What problem does your idea solve?
- Describe your significance, uniqueness or breakthrough
- What kinds of “customers” would benefit?

**Instructions:** It is very important that you provide benefits that pertain to your “customer” – whether it’s an investor, an end user buyer, a potential partner, etc. So, think in terms of what’s in it for the “customer” – how will they benefit from your technology or capabilities? Be BRIEF!

# VERY Green Technologies

## Residential and Business Energy Solutions

**We extract the “unused energy” created when running an appliance to run power tools, TVs etc.**

- Large appliances produce wasted, expensive energy – our device makes it easy to extract and recycle unused energy.
- The energy extracted from running a refrigerator for a month can provide enough recycled power to run a flat screen TV for a month
- Homeowners benefit from recycling energy from appliances – they save money!

**We plan to license our technology.  
If you're interested – let's talk!**
