

College of Education  
University of Nevada, Reno

## Mission of Our College

The College of Education has a commitment to inspire learners through collaboration and innovation. Our fundamental mission is to prepare the next generation of educators in a research environment while honoring our land-grant tradition. We strive to be a College of Education where faculty, staff and students are engaged in significant work and dedicated to improving education for each person. We seek to inspire those who pursue careers in education to value learning and the learner. Together, we provide information, service and support to community members including families, allied professionals and policymakers.

## Our Goal

Our goal is to help our students become professional educators who possess a love of learning, have a strong foundation of knowledge, engage in reflective practice, and value democracy and multiculturalism.
