Important Notification about your Registration Status

When you submit this Registration Form to UNR Extended Studies, you are certifying that all required immunization documentation is either

a) already on file at UNR (including a diphtheria/tetanus shot within the last 10 years, and two doses of MMR immunization if born in 1957 or later), or
b) attached to this Registration Form.

If UNR Admissions & Records returns your unprocessed Registration Form to Extended Studies due to lack of complete immunization documentation, you will receive one letter via U.S. Mail at the address on this Registration Form informing you of the missing documentation with a due date for submitting the required documentation. If this course meets too late in the semester for the above procedure to be practical, your registration cannot be processed and you will not receive a grade or credit for this course.

If your course requires WebCT, you will not have access to WebCT until your complete immunization documentation is received by Admissions and Records.

NOTE: Turn around for Extended Studies to notify you of missing documentation can take 3-4 weeks, which may be after you've completed all course work. Even if you have gone ahead and completed all course work, you cannot be registered without complete immunization documentation on file before grades are posted. You are strongly encouraged to ensure that the required immunization documentation is on file before it is too late to receive a grade/credit.
