**"This was the most
informative and applicable
grant-writing instruction
I have ever received."**

Texas A & M University

**"Truly an excellent and
worthwhile presentation.
Handouts great. Answers
to questions also great.
Very well organized. I feel
much better about grants
now and much more
confident about applying."**

Hunter College, CUNY

IMPROVE YOUR FUNDING RATE WITH BETTER GRANTSMANSHIP

Presented by Grant Writers' Seminar and Workshops LLC

This full-day seminar on successful proposal writing will address both conceptual and practical aspects. It will emphasize idea development, how to write for reviewers, and tips and strategies for using every part of the application to your advantage.

The presenter, M. S. AtKisson, PhD, established the highly successful grant writing and grantsmanship program at Tufts University using the principles developed by Grant Writers' Seminars and Workshops, and joined the group in 2008. The presentation is designed to be maximally informative while, at the same time, entertaining. Because emphasis is on the principles and fundamentals of good proposal writing for the sciences, the seminar is applicable across disciplines. Plenty of time will be allowed for questions and discussion. An extensive handout and examples that illustrate points made in the seminar will help to ensure that there will be maximal gain for the time invested.

Designed for investigators who have some exposure to writing grant applications, this seminar will benefit both new and senior faculty members. Post docs and advanced graduate students are welcome to attend.
