

## MAINTENANCE OF CAPACITIES TO PRODUCE COMMODITIES

Minerals Roundtable	Forest Roundtable	Rangeland Roundtable
<b>Criterion: Maintenance of Capacities to Produce Commodities</b>	<b>Criterion 2: Maintenance of Productive Capacity of Forest Ecosystems</b>	<b>Criterion 3: Maintenance of Productive Capacity on Rangelands</b>
<i>PC 1.1 Lands available for access for exploration, development, and protection.</i>	2.a Area of forest land and net area of forest land available for timber production.	23. Percent of available rangeland that is grazed by livestock.
<i>PC 1.2 Average grade of ores produced. PC 1.3 Identified resources. PC 1.4 Reserves. PC 1.5 Resources left behind/bypassed. PC 5.2 Stocks in use.</i>	2.b Total growing stock of both merchantable and non-merchantable tree species on forest land available for timber production.	25. Presence and density of wildlife functional groups on rangeland. 24. Number of domestic livestock on rangeland. 21. Rangeland above ground biomass.
<i>PC 2.1 Annual drilling length.</i>		
<i>PC 2.2 Annual amount budgeted for exploration.</i>		
<i>PC 2.3 Discovery rate per dollar of exploration expense.</i>		
<i>PC 2.4 Annual exploration rig use.</i>		
<i>PC 2.5 Annual domestic coal leases and licenses.</i>		
	2.c The area and growing stock of plantations of native and exotic species.	
<i>PC 3.1 National supply mix of energy and mineral commodities. PC 5.1 Consumption of energy and minerals during a specified time period. PC 5.4 Trends in consumption of mineral materials versus forest materials.</i>	2.d Annual removal of wood products compared to the volume determined to be sustainable. 2.e Annual removal of non-timber forest products (e.g., berries, fur bearers, game, mushrooms) compared to the level determined to be sustainable.	22. Annual above ground biomass production. 26. Annual removal of native hay and nonforage plant materials, landscaping and decorative plant materials, and edible and medicinal plants.
<i>PC 3.2 Co-product and by-product interdependence.</i>		
<i>PC 3.3 Idle production capacity as it relates to total.</i>		
<i>PC 3.4 Percent of natural gas (flared) and coal bed methane (flared) compared to total production of gas fuels.</i>		

MAINTENANCE OF CAPACITIES TO PRODUCE COMMODITIES

Minerals Roundtable	Forest Roundtable	Rangeland Roundtable
<b>Criterion: Maintenance of Capacities to Produce Commodities</b>	<b>Criterion 2: Maintenance of Productive Capacity of Forest Ecosystems</b>	<b>Criterion 3: Maintenance of Productive Capacity on Rangelands</b>
PC 3.5 Produced water.		
PC 4.1 Ratio of virgin to recycled minerals.		
PC 4.2 Pipeline and transmission line capacity.		
PC 4.3 Barge, fresh water shipping vessels, ocean-going vessels, rail, and truck transportation capacity.		
PC 5.3 Substitution and life span indicators.		
PC 5.5 Diversity of resource development: Products usage-percent of resource development products in use per sector.		
PC 5.6 Diversity of resource development: Products usage-percent of resource development derived energy used per sector.
