## TEACHING

### Michigan State University

PAM 201 Community Economics, Fall 1972 and 1973

An introductory economic principles course with emphasis on community decision making.

### Oklahoma State University

AGEC 5103 Introduction to Mathematical Economics, Fall 1974-76.

A microeconomic course emphasizing construction of economic models with mathematical logic and demonstration of ability to read professional economic journals. Subjects covered include consumer, producer, public household and market equilibrium theory. A Master's level course.

AGEC 6103 Advanced Mathematical Economics, Spring 1974 and 1976.

A microeconomic course similar to AGEC 5103 considering general equilibrium and welfare theory and an introduction to dynamic economic model building. A Ph.D. level course.

AGEC 5313 Food Distribution, Fall 1977

A marketing course emphasizing theory and applications related to markets for transformation of place, time and form dimensions of agricultural products. Regional specialization, interregional trade and marketing logistics functions are studied. A Master's level course.

### North Carolina State University

EB 401 Economics for Non-majors, Fall 1984

A microeconomic course designed to teach basic economic principles and their relevance to practical problems in all walks of life, including problems faced by businessmen, farmers, consumers, and public decision makers. It is designed for individuals with little or no formal background in economics.

### Kansas State University

AGEC 505 Market Structures, Fall 1987

Theory and applications of economic principles to marketing problems in agriculture. Pricing of agricultural output and productive services under various forms of economic organization and competition; regional specialization, location and trade; determinants of economic change; evaluation of economic and consumer welfare.

AGEC 445 Agribusiness Internship, Fall, 1986-1992

Development and supervision of summer agribusiness internships for undergraduate majors. A special summer project is conducted and reported to the class during fall. Enrollment is 15 to 18 annually.

### Colorado State University

IECC/ACC 270 World Interdependence, Population and Food, Spring, 2006, 2007

Survey of world population and food; emphasis on understanding food security and its population, economic, cultural, and scientific components, in a world context.

## INTERNATIONAL EXPERIENCE

Colombia, June 1 - August 23, 1971. Interview study on the causes of the international brain drain, project for

Master of Technology in International Development degree, North Carolina State University.

Honduras, January 4-12, 1986. Executive visit to USAID project entitled "Support of Price Stabilization and Marketing Research Programs in Honduras - IHMA."

Botswana, November 14-26, 1986. Executive visit to USAID project entitled "Agricultural Technology Improvement Project."

Costa Rica, August 5-19, 1987. Senior Economist to USAID project entitled "Evaluation of Policies and Programs of the Consejo Nacional de Produccion (CNP)." CNP translates to National Council of Production.

Sri Lanka, Sept. 30-Oct. 12, 1990. Food System Consortium Member, to assist Agricultural Cooperative Development International in the development of a project to study ways to coordinate work in areas of food systems, food security and food aid.

Pakistan, Oct. 13-Oct. 17, 1990. Executive visit to Agricultural Economics team members on KSU/AID project on bulk storage and transport of grain.

Mexico, 1994, 1996, 1998. Established agreements with ITESM, Monterrey, and University of Sonora, Hermosillo.

Israel, Binational Agricultural Research and Development Fund (BARD), Board member, 1995-2003, annual visits to Bet Dagan and research fields.

## **CONTRACT RESEARCH**

1. Project: Oklahoma Railroad Facility Information System  
Responsibility: Principal Investigator  
Sponsor: Oklahoma Department of Economic and Community Affairs - Cooperative Agreement 6067  
Contract: \$67,790  
Objective: To develop a computer information base for the railroad system of Oklahoma with

analytical capabilities to determine the profitability of pre-specified line segments, size of operating deficit and benefits which would accrue to a rail preservation project.

2. Project: Rail Wheat Transportation Efficiency Study  
Responsibility: Principal Investigator  
Sponsor: Texas A&M Research Foundation subcontracting for the Federal Railroad Administration under prime contract DOT-FR-65104  
Contract: \$115,724  
Objective: To enhance and improve the efficiency of the marketing/distribution system for grains in the hard winter wheat belt moving to domestic and export markets, recognizing and utilizing the inherent advantages of rail transportation.
3. Project: Energy Conservation in the Meat Processing Industry from Muscle Boning the Unchilled Bovine Carcass  
Responsibility: Member of Investigating Team to study transportation and plant location effects of implementing hot boning meat processing technology.  
Sponsor: Energy Resources Development Administration - EY-76-S-05-5097  
Contract: >\$2,000,000  
Objective: To develop the hot boning meat processing technology and to determine energy savings upon implementation of the new technology.
4. Project: A USDA Demonstration Project: Evaluating Resource Allocation to Rural Transportation Facilities  
Responsibility: Principal Investigator  
Sponsor: USDA, Science and Education Administration-Extension-Cooperative Agreement No. 12-05-300-418  
Contract: \$89,574  
Objective: To develop and demonstrate procedures to evaluate the allocation of public and private resources to rural freight and passenger transportation facilities.
5. Project: Grain Commodity Flow Study for Calendar Year 1977 - North Carolina  
Responsibility: Principal Investigator  
Sponsor: U. S. Army Corps of Engineers Contract DACW 72-78-C-0005 through the University of Illinois  
Contract: \$8,000  
Objective: To survey the 1977 flows of grain to and from North Carolina grain handling and processing firms.
6. Project: Seasonal and Directional Transport Rate Differentials Caused by Impediments to Backhauls  
Responsibility: Principal Investigator  
Sponsor: USDA-SEA-Cooperative Research: Cooperative Agreement No. 901-15-106  
Contract: \$44,929  
Objective: To discover the influence of backhaul opportunities upon the structure of efficient transport prices and to identify and measure diversions from the efficient price structure resulting from impediments to backhauls in the domestic livestock trucking and international grain shipping industries.
7. Project: The Economic Feasibility of Postharvest Cooling, Moisture Preservation and Storage

- Methods for Apples and Tomatoes in Western North Carolina
- Responsibility: Co-principal Investigator  
 Sponsor: Tennessee Valley Authority  
 Contract: \$8,500  
 Objective: To determine the economic feasibility of establishing apple and tomato facilities with pre-cooling and cold storage equipment in western North Carolina.
8. Project: Community Self-help in Developing Cooperative Shippers' Associations  
 Responsibility: Principal Investigator  
 Sponsor: U. S. Department of Transportation via USDA Extension: Cooperative Agreement No. 12-05-300-475  
 Contract: \$41,450  
 Objective: To develop a dissemination procedure for educational materials developed about cooperative shippers' associations.
9. Project: Microcomputer Decision Aids for Farm Management and Marketing  
 Responsibility: Principal Investigator  
 Sponsor: North Carolina State University Agricultural Foundation  
 Contract: 1983-84--\$5,400; 1984-85--\$4,000  
 Objective: To develop and document microcomputer programs to serve as farm management and marketing decision aids for use by county agents.
10. Project: The Future Directions of Kansas Agriculture and Agribusiness  
 Responsibility: Principle Investigator  
 Sponsor: Kansas Department of Agriculture  
 Contract: \$96,000  
 Objective: To project the role of agriculture and agribusiness in the economic development of Kansas.
