Video Name: Robotic Hands
Subject of Research: Robotics and 3D Printing

Keywords

Relevant Vocabulary
- **3D Printing**: A method of manufacturing by dispensing material in a certain formation. This can also be accomplished by fusing existing particles of material together.
- **Arduino**: A microcontroller (small electronic brain) that can run programs on circuits. In this application, it runs the circuit of the robotic hand.
- **Servo**: A small motor built to precisely control an angle.

Sample Questions
- What is one advantage of 3D printing?
- Which keywords are things that would be in a circuit?
