Potential Writing Center Planning & Reflective Assignments

Pre Planning
Example 1: What would you like to accomplish in your Writing Center session? What do you think you still need to do with your paper? What questions do you have for your writing consultant? What would make your Writing Center consultation effective?

Post Reflection
Example 1: What happened in the tutorial session at the Writing Center? What did the writing consultant point out you are doing well in this writing assignment? What advice did the writing consultant give you to improve this writing assignment? What did you do to revise this writing assignment, based on the Writing Center tutorial session?

Example 2: Writing Center Project: About 600 words
Once you have completed your writing center visits, you will need to write a reflection. Describe your own level of participation, what you hoped to get out of each consultation, and what actually happened. What did you learn about yourself and your writing through this experience? Discuss how you plan to use the Writing Center in the future. How will you apply what you did in today’s session to your writing? How and what will you revise?

Example 3: After your appointment, write a reflection on the session and your consultant’s feedback. What did you work on in your session? What are the primary issues your writing consultant identified? How will you address these issues as you continue to revise and work toward the final draft? What is your plan for your next actions?
