

Intensive English Language Center (IELC)
Immunization Requirement for International Students

University of Nevada
School of Medicine

Name: _____ STUDENT HEALTH CENTER

Date of Birth: ___/___/___ Gender: Male__ Female__ Country of Residence: _____
(mon) (date) (year)

As an International student, the following immunizations and/or tests are required before enrollment to UNR. In order to make your transition to UNR as smooth as possible, it is highly recommended that these be completed prior to arrival. Please provide documentation on this form of all completed immunizations.

*Tdap (Tetanus, Diphtheria, & Pertussis)
(Received within the last 10 years)

Date: ___/___/___
(mon) (date) (year)

*MMR (Measles, Mumps, & Rubella)
(2 vaccines needed: first one must have been received on or after the first birthday and dose #2 after age 4)

Date: ___/___/___
(mon) (date) (year)

OR

MMR Titer (blood Test)
(attach lab report)

Date: ___/___/___
(mon) (date) (year)

*Meningitis Vaccination
(mandatory for students who are 22 years old or younger and living in the residence halls. Received within the last five years.)

Date: ___/___/___
(mon) (date) (year)

*PPD skin test
(Tuberculosis testing within 6 months prior to enrollment)

Date Received: ___/___/___
(mon) (date) (year)

Date Read: ___/___/___
(mon) (date) (year)

Result: _____ mm

OR

QuantIFERON blood test
(attach lab report)

Date: ___/___/___
(mon) (date) (year)

Result: Negative or Positive

HEALTH CARE PROVIDER INFORMATION:

Print Name: _____ Address: _____

Signature: _____

Date: ___/___/___ Phone: _____

**Anti-sarampion will not be accepted as having had the MMR vaccine
Acceptable: Sarampion, Caxumba (Cachumba, Papeira, Paperas, Parotiditis), Rubeola, SPR, Triviral.
If tuberculosis test result is positive, a chest x-ray is required.

Immunization Requirements for International Students

Tdap (\$38.00): Vaccination must have been received within the last 10 years.

MMR (\$52.00): Two vaccinations are required. The first MMR vaccination must have been received on or after the first birthday.

If one or both vaccinations have been received before the first birthday, then the student must receive another MMR vaccination.

There must be at least four weeks between MMR dose #1 and MMR dose #2.

Meningitis Vaccination (\$95.00): Vaccination for meningitis is mandatory if the student is 22 years old or younger and is going to be living in the residence halls. The vaccination must have been received within the last five years.

QuantiFERON (\$50.00) or PPD skin test (Tests for Tuberculosis): A test for tuberculosis is mandatory for most international students (see exceptions listed below).* A PPD skin test or a QuantiFERON blood test are both acceptable. Students who have had either of these tests done in their country within the past six months will meet this requirement if documentation is brought with them. A chest x-ray can not be done in place of a PPD skin test or a QuantiFERON blood test. However, any student who has had a positive test result for Tuberculosis (PPD or QuantiFERON) must provide documentation of a chest x-ray completed within the past 6 months. If the tuberculosis test (PPD or QuantiFERON) result is positive, and there is no documentation of a chest x-ray done within in the last six months, the student will be required to have a chest x-ray done at the Student Health Center at UNR. ***Students who arrive to campus without proper documentation of a tuberculosis test (PPD or QuantiFERON) will be required to get a QuantiFERON blood test.***

These requirements must be met by all international students regardless of the length of their stay.

To make the registration process easier, it would be beneficial to have these immunizations and tuberculosis tests done before coming to the University of Nevada, Reno.

Documentation must be provided for all immunizations, tuberculosis test, and/or chest X-ray.

Documentation must include the dates and results (example: size of the tuberculosis test and negative or positive result for chest x-ray).

***These countries do not have to be screened for Tuberculosis:** Canada, Saint Kitts and Nevis, Saint Lucia, USA, Virgin Islands (USA), Austria, Belgium, Denmark, Finland, France, Germany, Greece, Iceland, Ireland, Italy, Liechtenstein, Luxembourg, Malta, Monaco, Netherlands, Norway, San Marino, Sweden, Switzerland, United Kingdom, American Samoa, Australia, and New Zealand.
