CONDITIONS OF OPERATION LISTED ON THIS PERMIT:
A. ALTERATIONS: This permit becomes void upon any change of ownership or address or any alteration of permitted equipment.
B. POSTING: This permit shall be posted on or near the equipment listed above. This permit shall be made readily available at all times while the equipment is operating.
C. MODIFICATION OF EQUIPMENT: Any modification of the equipment other than normal repair and maintenance will require a new permit.
D. RECORDS: Any records of operation which effect the potential of the source to emit air pollutants, such as fuel or products consumed, products produced, hours of operation, chemicals or supplies used in source operation, must be maintained for a period of at least 5 years and made available to the Control Officer upon request.
E. EQUIPMENT FAILURE: All upset or breakdown conditions resulting in increased emissions or air pollutants shall be reported in compliance with District regulations, Section 020.075 and 020.076.
F. ACCESS: The Control Officer will be provided access to the facility to inspect operations and equipment covered under this permit whenever necessary to determine compliance with this permit and any other air pollution limitations specified in District regulations.

ADDITIONAL CONDITIONS:
1: The annual throughput/consumption figures must be submitted in writing to the A.Q.M.D. no later than the 20th of the month, approximately 6 weeks prior to the expiration date of the permit.

2: All fuel burning equipment must be properly maintained according to the manufacturer's specifications.

3: Equipment must be properly vented in accordance with local code and manufacturers specifications

4: Emissions from the process stack(s) must not exceed 20% opacity or Ringelmann number 1 for more than 3 minutes per hour -- Section 040.005.A.

5: When fuel oil is the type of fuel burned, the oil sulfur content must not exceed 1% sulfur by weight -- Section 040.060.A. Without approval from the Air Quality Management Division (AQMD), number 5 or number 6 fuel oil cannot be used.

6: Burner(s) will operate within established temperature limits set by the manufacturer.

7: The operator must notify the Air Quality Management Division in the event that the primary type of fuel burned is switched from natural gas to fuel oil or from fuel oil to natural gas.
