SPANNER WRENCHES

Spanner wrenches are made in a variety of patterns as illustrated.

Proper Uses. Spanner wrenches are basically a machine shop tool. They are used on machine tools for adjusting collars, lock nuts, rings, spindle bearings, face plate draw nuts, etc.

Abuse/Misuse. Do not hammer on wrench handle. Do not use an extension on the handle.

When to Repair or Replace. Attempts to repair these wrenches are not recommended. If pins, hooks or forging are bent, deformed or cracked discard the tool.
