Charles River Laboratories is a global provider of solutions that advance the drug discovery and development process. In the past few years alone we’ve helped our clients with the critical research required to develop new, approved treatments for cancer, weight loss, cystic fibrosis, leukemia, IBS, epilepsy, Cushing’s disease and other conditions.

When you join Charles River, you become part of a family that has had a significant impact on the health and well-being of our families, friends and colleagues across the globe.

CRL has operations in the United States, Canada, United Kingdom, Europe, Japan, China, and has approximately 8,000 employees worldwide.

Current Openings:

- **Report Writer**: Responsible for publishing scientific data tables and establishing the framework of reports.

- **Animal Care Assistant**: Responsible for performing operational, administrative and technical tasks to provide comprehensive care for all species of laboratory animals.

- **Research Scientist I (Toxicology)**: Serve as a scientist in the conduct of assigned nonclinical research studies of basic to moderate complexity.

- **Research Associate (Technical Operations)**: Supervises and coordinates all study-related activities of research technical staff to ensure compliance with the protocol and applicable SOP’s.
