FIRE ECOLOGY FIELD TECHNICIANS NEEDED!

We are seeking enthusiastic field technicians for summer 2016 to assist with a study of understory vegetation recovery after prescribed burning in the Great Basin. Training will be provided.

DUTIES:
- Conduct vegetation sampling and collect other relevant ecological information from permanent plots.
- Collect sagebrush plants for subsequent dendroecological analysis.

REQUIRED QUALIFICATIONS:
- Ability to work and camp in remote backcountry areas in variable weather conditions for extended periods;
- Ability to walk over steep and uneven terrain;
- Ability to safely use hand tools for digging and cutting;
- Valid U.S. driver’s license.

DESIRED SKILLS:
- Great Basin plant identification;
- Previous experience conducting field sampling (especially vegetation);
- Experience operating 4WD trucks on and off-road.

JOB DETAILS:
- Location: Underdown Canyon, Shoshone Mountains, central Nevada, with the possibility of travel to other locations in the Great Basin (based out of Reno, NV)
- Duration: approximately late May to early August, 2016
- 40 hours/week
- Pay: $13-15/hour, depending on experience

TO APPLY: Send a resume, cover letter, and contact information for three references to Alexandra Urza (alexandra.urza@gmail.com). Respond by MARCH 4 for full consideration.

LAST ONE *DO NOT TAKE*
