IT PROFESSIONAL II - .NET DEVELOPER
APPROXIMATE ANNUAL SALARY - $50,195.52 to $74,813.04

This is a Software Developer (.Net) position located at 901 S Stewart Street, Carson City within the Nevada Division of Environmental Protection (NDEP). You must have knowledge and experience in the following areas: ASP.Net web application development, SQL Server or another relational database system development, SQL, T-SQL or similar database programming language. Experience and understanding of JQuery / Web services development model will be a plus. You must also be conversant with all phases of software development lifecycle.

We provide ample opportunity to learn new things and work with the latest technologies. Working at NDEP, you will be safeguarding our natural resources and promoting a cleaner, healthier environment. Typical work hours are from 8 am – 5 pm Monday through Friday.

Job Duties

For projects ranging from small to moderate in complexity:

- Requirements collection by conducting interviews, examining existing data systems, or similar research methods
- Developing prototypes
- Implementation of software modules in ASP.Net and related technologies
- Database development - SQL Server, T-SQL
- Regular reviews with the user group
- Deployment and testing of software systems
- Writing design documents and user manuals

Qualifications

A BS in Computer Science or closely related field with some experience in web and database development is required. If you are a problem solver and have performed well in your programming and database courses, you are strongly encouraged to apply.

Application Process

You need to apply online at the following link:
