Staff I, Associate Engineer

Staff Associate Engineers perform professional engineering assignments not requiring licensure by the State Board of Professional Engineers & Land Surveyors.

Minimum Qualifications: Certification by the Nevada State Board of Professional Engineers and Land Surveyors as an Engineer Intern; OR Bachelor's degree from an accredited college or university in civil engineering or a closely related engineering field; OR two years of journey level technical experience equivalent to an Engineering Technician III in Nevada State service; OR an equivalent combination of education and experience.

Employees in this class who are not registered professional engineers may not represent themselves as such to other persons or entities.

Applicants for Staff I, Associate Engineer who have passed the Fundamentals of Engineering examination given by the National Council of Examiners for Engineering and Surveying are not required to take the State's written test.
