Silver Standard, Marigold Mine

Website Address:  http://www.silverstandard.com/

Overview. Please provide a brief description and/or history of your organization.: Marigold Mine is owned and operated by Silver Standard Resources Inc. The Marigold Mine is located in Humboldt County, Nevada, United States on the Battle Mountain-Eureka trend. In production since 1988, Marigold is a large run-of-mine heap leach operation with several open pits, waste rock stockpiles, leach pads, a carbon absorption facility, and a carbon processing and gold refining facility.

Currently the mine utilizes a fleet of 290-tonne haul trucks and three loading units. For the period of active mining to 2023, mine material movement averages 71.8 million tonnes per year and ore tonnage delivered to the leach pads averages 15.1 million tonnes per year. Approximately 42,000 tonnes of ore are processed per day as run-of-mine ore stacked on the heap leach pads. The gold doré bars produced at the mine are shipped to a third party refinery.

Majors Seeking: Geophysics  Geology  Mining Engineering

What level(s) are you seeking?: Undergraduate

What types of positions are you looking for? (check all that apply): Internships

Is your organization interested in international student applicants?: Yes

Industry: 21 - Mining, Quarrying, and Oil and Gas Extraction
