Cashman Equipment Company
https://www.cashmanequipment.com/

Cashman Equipment is the Caterpillar equipment dealer in the state of Nevada and the Eastern Sierras. The company provides new and used equipment for sale and rental as well as high quality parts and service support to the construction, mining, energy, paving, laser site control, power, pump, and truck engine industries.

Cementation USA
en.cementation.com

Cementation USA is a mine contracting and engineering company that has been established to be an employer of choice that values its employee relationships. We specialize in the design and construction of underground facilities including shafts, mine development, raises, infrastructure and much more. Cementation USAs business culture and principles are focused on safety and client requirements in order to build and maintain long term relationships with our clients.
Charles River Laboratories
www.criver.com

Charles River is an early-stage contract research organization (CRO). We have built upon our foundation of laboratory animal medicine and science to develop a diverse portfolio of discovery and safety assessment services, both Good Laboratory Practice (GLP) and non-GLP, to support clients from target identification through preclinical development. Charles River also provides a suite of products and services to support our clients’ clinical laboratory testing needs and manufacturing activities. Utilizing this broad portfolio of products and services enables our clients to create a more flexible drug development model, which reduces their costs, enhances their productivity and effectiveness to increase speed to market.

With over 11,000 employees within 70 facilities in 18 countries around the globe, we are strategically positioned to coordinate worldwide resources and apply multidisciplinary perspectives in resolving our client’s unique challenges. Our client base includes global pharmaceutical companies, biotechnology companies, government agencies and hospitals and academic institutions around the world. And in 2016, revenue increased by 23.3% to $1.68 billion from $1.36 billion in 2015.

At Charles River, we are passionate about our role in improving the quality of people's lives. Our mission, our excellent science and our strong sense of purpose guide us in all that we do, and we approach each day with the knowledge that our work helps to improve the health and well-being of many across the globe. We have proudly supported the development of ~70% of the drugs approved by the FDA in 2016.

Charles River is committed to helping our partners expedite their preclinical drug development with exceptional safety assessment services, state-of-the-art facilities and expert regulatory guidance. From individual specialty toxicology and IND enabling studies to tailored packages and total laboratory support, our deeply experienced team can design and execute programs that anticipate challenges and avoid roadblocks for a smooth, efficient journey to market. Each year approximately 120 investigational new drug (IND) programs are conducted in our Safety Assessment facilities.

Clear Capital
https://www.clearcapital.com/

Clear Capital was founded with the core belief that making our customers successful opens the door to impact the mortgage industry for the benefit of all.

Since 2001, our willingness to adapt to changing industry needs, customer goals and evolving technology has allowed us to become a leader in property valuation solutions, and we are not done yet. We provide technology platforms that speed up loan decisioning, analytics that give real time insight into the real estate market and valuations that provide professional expertise on the condition, quality and value of
residential and commercial properties. But the real difference you will experience is our unwavering desire to solve your hardest problems.

Over the years we have built a team of passionate people that are committed to our customers' success. We hire the nicest, most talented staff in the industry who embrace modern techniques and never back away from a problem. We have also been fortunate to partner with a nationwide network of real estate professionals (appraisers, brokers and real estate agents) that know their local market and have the experience to prove it.

**Coeur Mining**
https://www.coeur.com/

Our purpose statement is, We Pursue a Higher Standard. Everything we do is fueled by this statement; it is our foundation and inspiration for our actions every day. At Coeur, we PROTECT our people, places and planet, DEVELOP quality resources, growth and plans, and DELIVER impactful results through teamwork.

Coeur Mining, Inc. is a well-diversified growing precious metals producer with five operations in North America. Coeur’s wholly-owned operations include the Palmarejo silver-gold complex in Mexico, the Silvertip silver-zinc-lead mine in British Columbia, the Rochester silver-gold mine in Nevada, the Kensington gold mine in Alaska, and the Wharf gold mine in South Dakota. In addition, the Company owns the La Preciosa project in Mexico, a silver-gold exploration stage project. Coeur also conducts numerous exploration activities in North and South America. Coeur's headquarters are located in Chicago, IL.

Coeur employs approximately 2,000 people. We are proud of the jobs we provide, the people we employ, and the communities we serve. Coeur identifies the importance of working together to tackle challenges head-on. Together, we welcome new ideas, and leaders who will own and deliver solutions. With 90 years of mining experience, Coeur understands the importance of innovation, responsible mining, and collaboration.

Coeur strives to integrate sustainable operations and development into our business decisions and strategic goals. We proactively conduct our business with a focus on positively impacting the environment, the health and safety, and the socioeconomics of the communities in which we do business. Our efforts can be simply stated as: "Producing AND Protecting."

**Dayton Valley Turf**
www.DaytonValleyTurf.com

The Best Turfgrass in Northern Nevada, Local Produce, and Hemp: Regenerative Organic Agriculture and Bio-dynamic Farming

**Denele Analytical**
https://denelelabs.com/
Denele Analytical, Inc. is an agriculture and environmental support laboratory with three locations in the San Joaquin Central Valley - the heart of the California growing region. Our analytical capabilities include analysis of plant tissue, soil, manure, lagoon and waste water, drinking and well water, olive oil, nuts, silage, fertilizer and feeds.

Staff:

Our staff of Certified Professional Agronomists, scientists, and chemists have years of experience to help with your specific needs and questions. Unlike many other labs, we are happy to provide assistance with your crop planning, fertilizer recommendations, and assessment of your growing conditions or irrigation management needs.

Everi
www.everi.com

Everi powers the casino floor by making top-shelf games. We make hit games, including licensed titles such as South Park, The Mask, Casablanca, Buffy, and Willie Nelson. Come make games with a team of creative problem solvers from a variety of backgrounds.

Friends of Nevada Wilderness
nevadawilderness.org

Friends of Nevada Wilderness is dedicated to preserving all qualified Nevada public lands as wilderness, protecting all present and potential wilderness from ongoing threats, educating the public about the values of and need for wilderness, and improving the management and restoration of wild lands.

GCW, Inc.
https://www.gcwengineering.com/

GCW is a high ranked and leading provider of a complete range of services: Transportation, Flood Control, Water/Wastewater, Structural, Survey, and Land Development (Commercial, Industrial and Residential)

Incorporated in 1969, GCW has offered comprehensive consulting services to public and private clients facing the challenges of new and aging infrastructure. Our integrated approach to project solutions builds value for clients and helps advance the best practices of the industries we serve.

Geologic Associates, Inc.
https://geo-logic.com/
Geo-Logic Associates provides multidisciplinary geologic, engineering, water resources, and environmental consulting in the U.S. and internationally.

**Geotemps, Inc.**
www.geotemps.com

Geotemps, Inc. is the expert you call when requiring professional temporary or temp-to-hire staffing and recruitment services for Mining, Engineering, Geothermal, and beyond. As an occasional service or an external HR department, Geotemps works with you to locate and employ the best match for your immediate needs, so you can put the emphasis on the work, not on the workers.

**HDR**
https://www.hdrinc.com/

We provide consulting services to a broad range of industry. These principles guide our actions:

Create technically credible and positive environmental, social and economic benefits for the communities where clients and employee-owners live, work and play.

Reduce fossil-fuel use, water consumption and waste generation.

Use financial resources efficiently on behalf of employee-owners and clients.

Capture opportunities to support client programs in order to help them meet their sustainability goals.

Provide technical opportunities and resources for our staff to increase sustainability-related expertise.

Steadily improve company operations and efficiency.

Track the environmental benefits of our projects.

Make decisions using the evaluation of environmental, economic and social equity whenever possible.

**J S Redpath Corp**
The U.S. operations of a global group of underground mining contractor company's.

**Kinross Round Mountain**
www.kinross.com

Round Mountain is an open-pit mine located in Nevada, one of the best mining jurisdictions in the world. Round Mountain uses conventional open-pit mining methods and processes ore by mill and heap leach.

Kinross began operating the mine in 2003, and it has since become a continuous improvement leader in the Company’s portfolio.
Lecor CMI
ledcor.com
Mining Construction company with several sites in rural Nevada

Mountain G Enterprise, Inc.
www.mgeinc.com
Mountain G. Enterprises, Inc. (MGE) certified personnel is composed of professionals with the background, experience, and expertise in Geographic Information Systems (GIS), project management, scientific, and environmental arenas. This diverse knowledge-base, in combination with consistent adherence to industry safety standards, gives MGE a competitive edge in the field of natural resource management and professional services.

Nevada Copper
www.nevadacopper.com
The Nevada Copper Way- A great team unlocking the full potential of a world class district creating value for all stakeholders.

Mining.

Nevada Department of Transportation
https://www.nevadadot.com/
NDOT was established in 1917 under the name of the Nevada Department of Highways. Until 1917, the state did not participate in any road improvements. The 1917 Legislature gave the state engineer general supervision of road work which was performed by convict labor. An appropriation of $20,000 was made, but the funds were quickly exhausted and all work ceased later that same year.

When the 1917 Legislature passed the State Highway Law, Nevada began an active roadway program, which has grown to approximately $600,000,000/per year of capital outlays to maintain and improve Nevada's highways.

The department is responsible for the planning, construction, operation and maintenance of the 5,400 miles of highway and over 1,000 bridges which make up the state highway system. The department is divided into three districts, with a district engineer and assistant engineers in each. The districts are responsible for supervising all state transportation activities within their local areas. NDOT's headquarters building is located in Carson City, with the three main district offices located in Las Vegas, Reno and Elko. Major maintenance stations are in Ely, Tonopah and Winnemucca. NDOT is overseen by a seven-member Board of Directors and directed by Senior Staff.
Transportation no longer means highways alone, but rather an integration of travel by rail, bike, air or bus. The department also oversees various allied projects from the Adopt-a-Highway program to the maintenance of State Historical Markers.

**Nevada Department of Wildlife**
http://www.ndow.org/

The Nevada Department of Wildlife (NDOW) is the state agency responsible for the restoration and management of fish and wildlife resources, and the promotion of boating safety on Nevada's waters. NDOW is organized into seven divisions (law enforcement, game, fisheries, conservation and education, habitat, wildlife diversity, and operations division) that develop programs and projects, and three regions (eastern, southern and western) that implement these programs.

In addition, NDOW coordinates agency planning activities, legislation, and support operations by assigning senior management level personnel to coordinate these efforts. The Department is led by a governor-appointed Director, who also serves as the Secretary of the Wildlife Commission.

The Nevada Board of Wildlife Commissioners, a 9-member, governor-appointed board, is responsible for establishing broad policy, setting annual and permanent regulations, reviewing budgets, and receiving input on wildlife and boating matters from entities such as the 17 county advisory boards to manage wildlife.

**NDOW's Mission**

To protect, conserve, manage and restore wildlife and its habitat for the aesthetic, scientific, educational, recreational, and economic benefits to citizens of Nevada and the United States, and to promote the safety of persons using vessels on the waters of Nevada.

**NEVADA DIVISION OF ENVIRONMENTAL PROTECTION**
https://ndep.nv.gov/water/rivers-streams-lakes

Nevada Division of Environmental Protection’s mission is to preserve and enhance the environment of the state in order to protect public health, sustain healthy ecosystems, and contribute to a vibrant economy. The Bureau of Water Quality Planning establishes, reviews and revises water quality standards for surface water, develops total maximum daily loads, manages the Non-Point Source Programs, issues Clean Water Act Section 401 water quality certifications and conducts statewide monitoring of surface waters.

**Nevada Division of Forestry**

The Division of Forestry provides professional natural resource & wildland fire management services to Nevada citizens and visitors to enhance, conserve and protect forest, rangeland and watershed values, endangered plants and other native flora.
Nevada Division of Minerals
minerals.nv.gov

Mission: To encourage and assist in the responsible exploration for and the production of minerals, oil, gas, and geothermal energy which are economically beneficial to the State, to provide for public safety by identifying, ranking and securing dangerous conditions at mines that are no longer operating, and collecting and disseminating information on exploration, production and related topics.

We accomplish this mission in a variety of ways, including a summer internship where environmental science majors assist in the inventorying and securing efforts of hazardous features in and around abandoned mines.

Nevada Division of State Parks
parks.nv.gov

Nevada Division of State Parks, manages 25 state parks, historical sites and state recreation areas.

Nevada Water Resources Association
www.nvwra.org

NWRA is a non-profit professional association whose mission is to provide education, training and networking opportunities for those interested in understanding, developing, conserving, and protecting Nevada's water resources.

NWRA has been in operation for over 69 years. In 1944, Tom Smith, State Engineer at that time, spearheaded a group who focused on groundwater and agricultural issues throughout the State. After many years of serving as a special interest group, the group became the Nevada Reclamation Association and eventually evolved to become the Nevada Water Resources Association.

NWRA is directed by a 17 member Board of Trustees representing four districts. They are from multi-disciplinary backgrounds and are all respected professionals in their area of expertise. Four representatives from each district serve on a voluntary basis with three of the members serving a three year staggered term and having full voting rights. The fourth representative serves for one year as an alternate and has voting rights in the absence of one of the full term representatives. The State Engineer is an ex-officio member.

NWRA hosts an annual conference targeted towards water professionals throughout the State. The conference takes a multi-disciplinary approach to discuss current and ongoing statewide water issues critical to sustaining Nevada's rapidly growing population and the many competing interests. The primary goal of the conference is to bring key issues to the table for discussion and to provide water managers, policy makers, environmental representatives, federal and state agencies, private consultants, and the general public with a more comprehensive understanding of these issues; including the technical component and legal aspect of each issue.
NWRA currently hosts a variety of workshops, classes and symposiums that cover a broad range of topics, from Nevada Water Law, the Lake Tahoe Basin, Well Construction Methods, the Truckee River, Mine Water Management, and Ground Water. Previous workshops included Sustainability of Southern Nevada's Water Resources, Nitrate Management, International Limnogeology Congress, Ground Water Recharge, and Climate Change. Please visit our website at www.nvwra.org for membership and event information.

Newmont Mining
www.newmont.com

Founded in 1921 and publicly traded since 1925, Newmont is headquartered in Greenwood Village, Colorado. We have approximately 24,680 employees and contractors, with the majority working at managed operations in the United States, Australia, Ghana, Peru, and Suriname. Newmont is an industry leader in value creation and the only gold producer listed in the S&P 500 index. Our purpose - to create value and improve lives through sustainable and responsible mining - is guided by five core values: safety, integrity, sustainability, inclusion and responsibility. We are proud to have been named the mining industry leader in overall sustainability by the Dow Jones Sustainability World Index in 2015, 2016 and 2017.

NNACA-Northern Nevada Apprenticeship Coordinators Association
www.buildingtradejobs.org

The Northern Nevada Apprenticeship Coordinators Association (NNACA) is your gateway to paid apprenticeship training in the in-demand, high-paying fields of advanced construction, engineering, and high-tech trades. Good wages and full benefits begin on day 1 of our apprenticeship programs, which include: Construction Craft Laborers, Electricians, Heat & Frost Insulators, Ironworkers, NV Energy, Operating Engineers, Painters and Allied Trades, Plasterers and Cement Masons, Plumbers and Pipefitters, Sheet Metal Workers, and Stationary Engineers

Placer County Human Resources
www.placer.ca.gov

Placer County is a prosperous community characterized by a healthy and diverse economy, attractive business environment, and residents who benefit from high quality educational, safety, and healthcare infrastructure, in addition to a wide variety of outstanding recreational opportunities. The government center of Placer County (located in Auburn) is 30 miles northeast of Sacramento, the State capital. Stretching over one hundred miles, from the breathtaking vistas of the truly one-of-a-kind Lake Tahoe down through the verdant foothills of the Sierra Nevada Mountains to the lush Sacramento Valley, Placer County encompasses some of the most beautiful and diverse scenery in Northern California.
Placer County offers a generous benefits package. Benefits include Medical, Dental, Vision and CalPERS retirement, as well as 13 paid holidays, 12 days/year paid sick leave, generous vacation allowances, 100 hours/year management leave (for management classifications), and more.

**Sierra Nevada Journeys**
https://www.sierranevadajourneys.org

Sierra Nevada Journeys (SNJ) is a 501(c)(3) non-profit with the mission to deliver innovative outdoor, science-based education programs for youth to develop critical thinking skills and to inspire natural resource stewardship. The organization vision is to build a community of youth who are leaders, scientists, and stewards of the natural world. Serving Nevada and California, SNJ has a history of bringing informal STEM (science, technology, engineering, and math) education to children, families, community members and educators.

SNJ's 1st-6th grade programs include field-science experiences, in-class lessons, professional development opportunities for teachers, family outreach initiatives, and residential outdoor school programming at the SNJ campus, Grizzly Creek Ranch. SNJ has over a decade of experience building and delivering STEM programs, as well as successful partnerships in the community to advance its mission.

**Sierra Sciences**
www.sierrasi.com

Biotech Research focused on lengthening telomeres.

**Southwest Gas Corporation**
www.swgas.com

**HEAT UP Your Career!**

Southwest Gas has been members of your community for more than 80 years! The excellent service we provide our customers is ignited by our dedicated employees. We are always looking for talented individuals to join our natural gas family. Offering competitive compensation and benefits packages, Southwest Gas is the perfect place for those who wish to build up the communities we serve.

**About Our Rich History**

Southwest Gas Corporation was founded in 1931 and is a subsidiary of Southwest Gas Holdings Inc. We provide natural gas service to Arizona, Nevada, and portions of California. Our communities, and the more than 2 million customers we serve, are the reasons why we've been heating things up for decades. So, whether you're enjoying a backyard BBQ with friends, getting cozy indoors during the winter, or preparing an epicurean delight in your new restaurant, Southwest Gas is here to support your comfort and your lifestyle.
Fueling the Future Together

Being able to provide outstanding service to all our customers has always been a privilege that we don't take for granted. We strive to make a positive impact and improve the lives of those around us. We're proud of our commitment of time and resources to invest in the communities we serve.

2 MILLION CUSTOMERS AND GROWING

We're grateful you've made natural gas a part of your home and business. Now it's time to HEAT UP Your Career!

SSR Mining - Marigold Mine
www.ssrmining.com

Marigold Mine

Track Record of Growth and Performance

The Marigold mine is located in Humboldt County, Nevada, United States on the Battle Mountain-Eureka trend. SSR Mining completed the acquisition of Marigold on April 4, 2014 and published a technical report in July 2018.

In production since 1989, Marigold is a large run-of-mine heap leach operation with several open pits, waste rock stockpiles, leach pads, a carbon absorption facility, and a carbon processing and gold refining facility. Currently the mine utilizes a fleet of 290-tonne haul trucks and three loading units. Based on the Marigold updated life of mine plan announced on June 18, 2018, for the period to 2027, the mine is expected to produce on average approximately 211,000 ounces of gold per year. The gold doré bars produced at the mine are shipped to a third party refinery.

Highlights of the Marigold mine include:

- Mineral Reserves: Probable Mineral Reserves of 3.00 million ounces of gold at an average grade of 0.46 g/t, including 0.19 million ounces of gold in leach pad inventory, as at December 31, 2017.

- Potential for mine life extension: Indicated Mineral Resources of 5.47 million ounces of gold at an average grade of 0.46 g/t, including 0.19 million ounces of gold in leach pad inventory, as at December 31, 2017.

- 2018 Production guidance: Anticipated production of between 190,000 and 210,000 ounces of gold in 2018.

- Marigold operating outlook: Updated life of mine plan for the Marigold mine forecasts average annual production of approximately 236,000 ounces per year over the next six years to 2023, with peak production over 265,000 ounces of gold in 2021 and 2022, a more than 30% increase over 2017. Refer to news release dated June 18, 2018.
Exploration: Approximately $9 million planned for exploration in 2018 will target infill drilling of higher grade zones within the Mackay zone and commence a more focused program on the Red Dot deposit for the potential conversion of Mineral Resources to Mineral Reserves. Additionally, deep sulphide exploration drilling during 2017 has confirmed the presence of permissive rock units at depth.

State of Nevada Department of Agriculture
agri.nv.gov

State of Nevada Department of Agriculture

The Great Basin Institute
www.thegreatbasinstitute.org

The Great Basin Institute is an interdisciplinary field studies organization that promotes environmental research, education, and conservation throughout the West. Founded in 1998 at the University of Nevada, the Institute's mission is to advance applied research and ecological literacy through community engagement and agency partnerships to support national parks, forests, open spaces and public lands. GBI is a member of the Great Basin Landscape Conservation Cooperative (LCC), a multi-agency collective that brings together researchers, tribes, universities, federal, state and local governments, and non-governmental organizations to address and protect the natural and cultural resources essential to sustaining our health and quality of life.

TriNet
www.trinet.com/careers

TriNet is a leading provider of comprehensive human resources solutions for small to midsize businesses (SMBs). We enhance business productivity by enabling our clients to outsource their HR function to one strategic partner and allowing them to focus on operating and growing their core businesses. Our full-service HR solutions include features such as payroll processing, human capital consulting, employment law compliance and employee benefits, including health insurance, retirement plans and workers' compensation insurance.

TriNet has a nationwide presence and an experienced executive team. Our stock is publicly traded on the NYSE under the ticker symbol TNET. If you're passionate about innovation and making an impact on the large SMB market, come join us as we power our clients' business success with extraordinary HR.

Truckee Meadows Water Authority
tmwa.com

Truckee Meadows Water Authority (TMWA) provides municipal water to over 400,000 people within Washoe County.
Urban Roots
urgc.org

Urban Roots is founded on the idea that the garden is a powerful tool for improving academic instruction, developing healthy habits, and sowing a respect for the environment. In order to realize our mission of growing healthy minds, bodies, and communities, we provide school and garden-based opportunities for teachers, students, families, and partnering organizations.

USDA - Forest Service - Lassen National Forest
https://www.fs.usda.gov/lassen

The Forest Service offers a wide variety of careers and the ability to move around the country. We have positions in engineering, forestry, timber, biology, archaeology, and administration to just name a few.

The Forest Service has many opportunities for recent graduates as well students still attending school. Through the Pathways Programs recent graduates can obtain career opportunities while competing with less people for those positions. Internships can provide students with on the job training during the school breaks while earning a wage.

USDA Natural Resources Conservation Service
USDA Natural Resources Conservation Service (NRCS) conservationists provide technical expertise and conservation planning for farmers, ranchers and forest landowners wanting to make conservation improvements to their land.

Walker Basin Conservancy
walkerbasin.org

Established in 2014, the Walker Basin Conservancy (WBC) is leading the effort to restore and maintain Walker Lake while protecting agricultural, environmental and recreational interests in the Walker Basin. The Walker Basin Conservancy has offices in Yerington and Reno. The Walker Basin Conservancy is a 501(c)3 nonprofit organization. EIN: 47-1989228.

Western Cultural Resource Management, Inc.
www.wcrminc.com

WCRM is a professional consulting firm whose purpose is to provide cultural resource consulting services to firms, agencies, and individuals throughout the western United States. Within the United States, these services ensure the implementation of numerous federal mandates, specifically, the National Historic Preservation Act (NHPA) of 1966, as amended, its provisions and policies, including the Section 106 process, as well as applicable state and local regulations.

WCRM services include archival research for historic, anthropological, and archaeological background assessments, file and literature reviews, cultural resources planning, field inventory, resource evaluations, artifact identification and analysis, artifact conservation, report preparation, subsurface
testing of sites for National Register of Historic Places (NRHP) eligibility, Historic American Buildings Survey / Historic American Engineering Record (HABS/HAER) documentation of historic structures, development of historic and prehistoric contexts, project monitoring for subsurface resources, avoidance GIS intersection analysis, data recovery plan development and implementation, preparation of sections for environmental assessments / environmental impact statements (EA/EIS), development of programmatic / memorandums of agreement, and Native American consultation under NHPA, the American Indian Religious Freedom Act (AIRFA), and Native American Graves Protection and Repatriation Act (NAGPRA) legislation.

Wood Environmental and Infrastructure Solutions
www.woodplc.com

Wood is a global leader in the delivery of project, engineering and technical services to energy and industrial markets. We operate in more than 60 countries, employing around 60,000 people, with revenues of around $10 billion. We provide performance-driven solutions throughout the asset life cycle, from concept to decommissioning across a broad range of industrial markets, including the upstream, midstream and downstream oil and gas, power and process, environment and infrastructure, clean energy, mining, nuclear, and general industrial sectors. We strive to be the best technical services company to work with, work for and invest in.
