ROLE DESCRIPTION

Role Title: Commercial & Business Analyst  
Location: Pumpkin Hollow

Department: Commercial

Reporting to: (Position Title) Chief Commercial Officer

Updated by:  
Date: February 7, 2019

Role Summary

Responsible for supporting the Chief Commercial Officer (CCO) in all aspects, with a focus on data analysis, performance monitoring, model development, risk management and performance monitoring, across various aspects of Nevada Copper’s business.

This position works closely with the Senior Leadership Team, other operational leaders across the organization, and key support departments to ensure integration of activities and analysis efforts in order to advance the strategic plan and operational priorities.

Key Duties & Responsibilities

**Data Analysis:** Work with the CCO to identify areas of the business where opportunity exists to improve performance and collect and analyse data to inform decision making, including Supply Chain, Operations, Insurance, Risk and Human Resources.

**Performance Monitoring:** Develop models to allow understanding and monitoring of business performance in a range of areas.

**Crisis Management:** Support the CCO in materials and plans required to manage significant or crisis events.

**Board and High-Level Presentations:** Support the development of high level board and executive management presentations.

**Risk Management:** Support the development of tools and models for risk management. Work as an integral part of the risk management system for a mining company.

Skills & Qualifications

- A tertiary qualification in mining, processing, geology, business, or a related field.
- Entrepreneurial, creative, enthusiastic.
- Strong Excel skills
- Strong business and system analytical skills – ability to analyze and interpret data effectively from multiple sources (databases, documents, etc.)
- Exposure to SAP an advantage
- Proven track record of innovative thinking
