Earn a Mathematics PhD or Statistics & Data Science PhD
Department of Mathematics & Statistics @ UNR

Program Highlights

• **20+ graduate faculty & multiple degree options** to choose from: Earn a PhD in Mathematics (Pure or Applied options) or a PhD in Statistics & Data Science.

• **Faculty** are engaged in cutting edge research on topics spanning pure and applied mathematics and statistics; collaborations via local, multi-institution, and international partnerships; and interdisciplinary work with experimentalists. Graduate students have the opportunity to be part of these exciting discoveries.

• **Research funding** comes from various federal and private sources including NSF, NIH, DOE, NASA, and USGS.

• **Quantitative careers pay well.** Median salaries for Mathematics PhDs in Business/Industry exceed **$100,000/year** and for Statistics PhDs in Business/Industry exceed **$150,000**. Data Scientists changing jobs average a 16% pay increase.

• **Job options.** Alumni of our program have gone on to Academia, Amazon, Microsoft, various Public Health Departments, Insurance companies, Banks, Government & more!

• **Internships and External Research Opportunities.**

• Doctoral students will receive a **competitive stipend**, tuition waiver, and a subsidized medical plan.

Application Requirements

• Preparation equivalent to a BS in Mathematical or Statistical sciences is expected. See the website below for further details.

Application deadlines

• Application review begins **Dec 1st** for Fall admission. Later applications are accepted until available positions are filled.
