Married with Special-Needs Children looks at the ways in which having a child with special needs can make it more difficult for a marriage to thrive and how a child’s intensive needs can change the structure of a marriage. The authors examine many of the underlying stresses and common pitfalls—a couple’s differing coping mechanisms and expectations of a child, communication breakdowns and difficulties resolving conflicts, for example. They then present a wide range of strategies for handling or preventing these problems.

Material # 110.133
Addresses the importance of parents as educational resources and the responsibilities of both parent and school staffs in cooperating effectively. It encourages honest communication and recognition of emotional issues; it asks school staffs to "go the extra mile" in understanding the enormous pressures parents face in raising a child with disabilities. The ultimate emphasis is on the heart, on moving beyond rigid ideas and assumptions to working relationships that acknowledge and accept a feeling of focus, the "power of the heart." 43 minutes. Has Manual.

Visual impairment in infants, toddlers and preschoolers must be identified early so that appropriate treatment referrals can be facilitated, outcomes designed and early intervention services provided. Includes visual development assessments and checkpoints.

Also see: Early Intervention
Material # 320.107

This manual examines issues concerned with the education and employment of individuals, primarily males, with color vision deficiency. Problems in adulthood and childhood are discussed including the heavy use of color in childhood education.

Also see: n/a

Material # 320.104

The purpose of this booklet is to help parents of young children who are visually impaired or blind, understand what Orientation and Mobility is and how you can influence the independence of your child.

Also see: Parents/Families Orientation & Mobility

Guides

Material # 330.100

This resource guide offers a number of checklists and forms that will facilitate the process of learning media assessment if used with sound professional judgment. The focus must remain on the student's needs and on using the process to address those needs.

Also see: Assessment

Material # 330.102

This is the resource guide for VI certified teachers serving students in regular, special ed, and resource classrooms as itinerant and classroom teachers. It includes Assessment guidelines, strategies for IEP development, information of adapting materials and environments includes tactual and visual symbols as a means of communication, special needs of students with cortical visual impairment and post trauma vision syndrome, biobehavioral state management of students with profound impairments, the importance of intervention for infants and toddlers, and much, much more!

Also see: Professional Resource

Material # 330.103

An introduction to the unique educational needs of students who are blind and visually impaired.

Also see: Professional Resource

Material # 330.104

A booklet for parents of blind or visually impaired infants with suggestions for assisting development from birth to the walking stage.

Also see: Parents/Families Orientation & Mobility

Material # 330.108

This manual introduces and answers several common questions related to visual impairments for both parents and teachers.

Also see: Parents/Families

Material # 330.109

This guide discusses eight different categories of adaptive procedures, how visual perception develops and its relationship to the brain, ways to use various tools and strategies to increase the visibility to educational materials, and how to address vision issues in integrated classrooms.

Also see: Parents/Families

Material # 330.110

Dennison, E.M., & Klair, V (Eds.) (2003). Eye conditions in infants and young children that result in visual impairment and syndromes and other conditions that may accompany visual disorders. Logan, UT: SKI-HI.

Handbook that describes eye conditions in infants and young children that result in visual impairment. Syndromes and other conditions that may accompany visual disorders are described. The handbook contains information on over 100 eye disorders including medical aspects and treatment of the disorders, implications for functional and hearing, suggestions for needed adaptations, and follow-up reading.

Videos

Material # 310.100

This video shows how children with visual impairment are integrated into a regular classroom. They meet children with albinism, aphakia, nystagmus, coloboma, glaucoma, optical atrophy, and retinitis pigmentosa, and experience simulations demonstrating the vision of each child. Classroom adaptations for students with visual impairments are also shown and discussed. The video is excellent for use with administrators and teachers in inclusive settings. 30 minutes.

Also see: Inclusion

Material # 310.101

This video discusses the prevalence of Cortical Visual Impairments, how a diagnosis is made, and what intervention strategies are best for the child. Has accompanying article. 54 minutes.

Also see: n/a

Material # 310.102

This very informative video provides an overview of Cortical Visual Impairment, skills to effectively interact with CVI children, and activities for visual stimulation. The video was created by the Visually Impaired Program - Sunny Hill Health Center for Children at British Columbia's Children's Hospital. 15:45 minutes.

Material # 310.103
South Dakota Department of Education & Cultural Affairs, & The Blumberg Center Indiana State University. (1995) Functional vision learning to see [Videotape]. (Available from the Blumberg Center, 1-800-438-9832)
This video was developed to help educators and parents understand how children see, it shows children with significant visual impairments using their vision to learn, and it covers information needed to conduct functional vision assessments. (18 minutes) CLOSED CAPTIONED.
Also see: Parents/Families

Material # 310.104
South Dakota Department of Education & Cultural Affairs, & The Blumberg Center Indiana State University. (1993) Functional vision learning to look [Videotape]. (Available from the Blumberg Center, 1-800-438-9832)
Developed from input from parents, doctors, educators and vision specialists, this video discusses the six voluntary visual behaviors that we all use to see. Positive examples of children with significant visual impairments learning to use their vision are provided. Parents are empowered through positive teaching and support methods. Available in English and Spanish. CLOSED CAPTIONED. 18 minutes.
Also see: Parents/Families

Material # 310.106
Focuses on a team approach to create the best possible learning environment for mainstreamed blind or visually impaired students. A variety of support services and adapted equipment are demonstrated. A discussion guide is included. 19 minutes.
Also see: Inclusion

Material # 310.107
Most people regarded as blind have some usable vision. This video describes the major types of visual impairment, their causes and effects on vision, while camera simulations approximate what people with each impairment actually see. Also demonstrates how people with low vision make the best use of the vision they have. 20 minutes.
Also see: n/a

Material # 310.108
Demonstrates how elementary and high school students with severe visual impairments use adaptive methods and materials in school. Includes simulations of various visual impairments. Excellent for use in teacher inserviceing and disability awareness programs. 12 minutes.
Also see: Assistive Technology

Material # 310.109
This informational video covers all aspects of a successful Braille education program. Teachers of children who are blind or visually impaired and their students demonstrate how Braille is learned and used from preschool through high school and describe in their own words how Braille skills contribute to literacy, independence, mastery of academic skills, and successful education experiences in the regular classroom. Discussion guide included in video pack. 25 minutes.
Also see: Parents/Families

Material # 310.110
Demonstrates a comprehensive battery of vision tests that are appropriate for infants under 12 months of age. These test include: Versions, Hirshberg, Krinksky, Unilateral and Alternative Cover, and Base out Prism (fixation and eye alignment tests); Pupillary Response; Vestibular Ocular Reflex; Retinoscopy; contrast Sensitivity; Color Vision, Depth Perception, Visual Field, and Visual Acuity (behavioral tests); Visual Evoked Potential and Electroretinography (Electrophysiological tests); and checking ocular health. Has manual. 20 minutes. CLOSED CAPTIONED.
Also see: Early Intervention

Material # 310.111
Relates the experiences of a child with severe visual impairments as he begins attendance in a public school. Finding mobility a challenge, it became a team project to incorporate orientation and mobility training into his educational program. Discusses strategies and team member roles. 13 minutes.
Also see: Orientation & Mobility

**Material # 500.100**

Also see: Early Intervention, Parents/Families

**Material # 500.104**

Stresses the reciprocal and functional nature of communication. Contains introduction to nonsymbolic communication, offers instructional guidelines for incorporating it, and presents hypothetical studies (drawn from composites of actual cases) that help move plans into practice.

Also see: Parents/Families, Professional Resource

**Material # 500.105**

This book addresses the needs of children of all abilities, from those who use nonlinguistic forms of communication such as objects and body movements to those who use linguistic forms such as sign language and writing.

Also see: Dual Sensory Impairment

### Manuals

**Material # 520.100**

Defines object symbols and the functions of communicative behavior. Provides a model for developing requesting behaviors using object symbols.

Also see: Parents/Families, Professional Resource

**Material # 520.101**

Outlines issues affecting decision processes for augmentative communication intervention, highlights points of particular concern for deaf-blindness, and recommends possible courses of action and additional resources.

Also see: Dual Sensory Impairment

**Material # 520.103**

Defines touch as a communication tool and strategies to pair touch with speech to enhance receptive language. Provides a method to assess and select students for whom this would be appropriate. It also provides suggestions for design, implementation and evaluation of touch-speech programs.

Also see: Professional Resource

**Material # 520.105**

Nonsymbolic communication - theoretical orientation; instructional guidelines and enhancement.

Also see: Professional Resource

**Material # 520.106**

A collection of fun activities for working with non-speaking students. Each activity includes instructions on incorporating augmentative communication systems into the classroom and small group settings.

Also see: Professional Resource

**Material # 520.108**

An exciting new guide to help you develop comprehensive intervention programs for children using AAC. Filled with suggestions and materials to improve the social interaction, independence, and participation. In depth material for training the people who interact most with these children, including classroom assistants, peer buddies, teachers, etc. Therapy activities, worksheets, questionnaires, observation protocols, and sample communication boards all help you develop successful AAC skills with your clients.

Also see: Professional Resource

**Material # 520.109**

This is a collection of 3 manuals (one for staff, teachers and parents) each intended to stress the importance of planning to meet the communication needs of students who use alternative communication modes. There is a communication profile that is intended to record how the individual communicates. The profile aims to ease transitions to new environments.

Also see: Parents/Families, Professional Resource
Material # 430.103
Time to Learn is an environmental inventory designed for teachers of children who are deafblind or who have other severe or multiple disabilities. The inventory is used to identify and create opportunities for active participation and steady learning in everyday classroom activities. The 55-page booklet contains both the User's Guide and the Inventory. Has a accompanying DVD with examples of learning opportunities described in the Time to Learn book and inventory.
Also see: Professional Resource

Material # 520.102
This manual addresses how to interact through touch with a child who is deaf-blind or visually impaired and have additional disabilities. The content offers ways to engage children who do not clearly demonstrate understanding or use of symbolic communication and frequently need tactile information to support their learning.
Also see: Professional Resource

Material # 530.100
This guide was developed for staff and families of students with multiple impairments including deafblindness. The purpose of the guide is to communicate the benefits of calendar systems, provide information for calendar programming to be based on students' current needs and skills, and provide information on the continuum of calendars so that staff and families are able to make decisions regarding expanding students' skills.
Also see: Dual Sensory Impairment

Material # 530.101
This guidebook provides a basic overview of the various modes of sign language interpreting used by students who have dual sensory impairments or deaf-blind. It is designed in a simple "do" and "don't" fashion to clarify positions or sign language production that is most ergonomically and linguistically correct.
Also see: Dual Sensory Impairment

Videos
Material # 510.107
The video illustrates how to assess a child's current level of expressive ability, build on that ability, then gradually work toward more advanced communication. 24-minutes. Includes workbook.

Material # 510.130

This series presents a system of coactive signs that has been designed for use by individuals who are deaf-blind and may also benefit children who are severely multihandicapped. Provides professionals and families a clear, precise guide and reference for learning and using a coactive sign system. In coactive tactile sign, the signer takes the deaf-blind child's hand and helps the child make the signs.

There are nine tapes. The first six tapes consist of twelve beginning lessons which contain vocabulary considered essential to the young child's functioning, teaching tips, demonstrations showing the signs being used in daily activities. The last three are videos to build and enrich the information in the first six. Series has manual. 60 minutes each.

Guides

Material # 730.100
A curriculum guide for professionals and parents, which focuses on preparing the student/individual for the transition into the community. Provides a step-by-step process to develop goal and objective plans, which also includes examples of activities and strategies for specific age groups.
Also see: Transition/Emp/Adult Parents/Families

Kits

Material # 780.100
A collection of materials that guide families through children's early learning experiences which lay the foundation for literacy. The kit includes 3 packets that include a story book, an activity guide and a cassette tape. The first packet *Belly Button* aims to increase self awareness; the second *Doing, Doing, Doing* develops skills pertaining to object identification, use of symbols and listening; the goal of the third packet, *Perkins Goes Out*, is to help explore new environments, expand the use of pretend play, and further develop concepts essential to early literacy. A resource guide, a big stuffed panda, and a story box with props are included in the kit.
Also see: Parents/Families Professional Resource

Material # 780.101
This kit is a collection of materials that are based in the learning to learn model. This model involves instruction in communication development and concept development that is integrated into typical classroom activities. Four components of the model are: assessing the child, developing a learning plan, teaching and learning, and monitoring performance to promote progress. This kit includes:
* A Guide to the Learning to Learn Model and Instructional Materials
*Tangible Symbol Systems (DVD and accompanying manual)
*Its Always Time to Learn: An Environmental Inventory to Help Teachers Design Learning Activities for Children who are Deafblind (has a DVD with examples)
*First Things First: Early Communication for the Pre-Symbolic Child with Severe Disabilities
* Hands-on Problem Solving for Children with Multiple Disabilities: Guide to Assessment and Teaching Strategies
* Communication Matrix: A Communication Skill Assessment
Also see: Assessment Dual Sensory Impairment

Material # 730.101
This is a practical guide that uses a theme-based approach to help teachers create meaningful learning opportunities for students with multiple disabilities. It is filled with very easy to replicate activities that can become a springboard for more activities and ideas. All activities are referenced in a critical skills chart that ties them to the skills and concepts they address. Examples of how activities relate theme-based teaching to the educational standards are also included.

**Books**

Material # 1000.102

This book investigates person centered planning, its practices and its effects on people's futures. It includes a guide to person centered planning. It expands the power that people have to choose life conditions and experiences that make sense for them.

Also see: n/a

---

**Manuals**

Material # 1020.101

This manual assists transition planners in helping individuals with deaf-blindness move successfully into the community. Included in this work is a personal information book that transition planners, individuals, or families can use with individuals who have deaf-blindness when transition planning is taking place.

Also see: Dual Sensory Impairment

Material # 1020.102

Provides valuable information on transition issues for students with deaf-blindness and developmental disabilities. Discusses the issue of personal futures planning from the perspective of the individual with disabilities.

Also see: Professional Resource
Material # 1020.105

This manual is designed to give readers a basic understanding of the values and methods of person-centered planning.

Also see: Professional Resource

Material # 1020.108

This manual demonstrates the abilities, skills and preferences of a student who is deaf-blind. The first section is examples of information that the student may want to include in his/her portfolio. The second half of the manual is made up of blank forms that the student may use for him/herself. It's purpose is to ease the transition for the student between schools and grade levels, facilitate educational planning, and to act as a supplement to the traditional assessment methods.

Also see: Dual Sensory Impairment Assessment

Material # 1020.109

This manual is a person-centered planning process designed to facilitate the development of educational plans that will lead to inclusive education programs for young children with disabilities. Families can use the manual to state their hopes and dreams about their child's future. Service providers can use the manual to interview a family regarding their desires for their child's future.

Also see: Parents/Families

Material # 1030.101

This guide is specifically designed to assist students in assessing their own learning style & to help students measure the strengths & weaknesses of potential post secondary settings. The best time to begin using the guide is when the student is still in high school and beginning to determine what career choices they may want to pursue. The Guide can also be used by adults or non-traditional students interested in attending college.

Also see: Parents/Families

Material # 1030.102

This guidebook is an introduction to personal futures planning. It is written for family members and advocates, although others who want to know more about personal futures planning will find it informative. This booklet explains personal futures planning and how it is accomplished. It is not intended as instruction on how to actually do it.

Also see: Parents/Families

Material # 1030.106

This guide provides educators and other service providers step-by-step plans to create transition maps for individuals with deaf-blindness.

Also see: Professional Resource

Material # 1030.108

Provides a practical definition of transition services, information on medical and health issues, and a guide to developing recreation and leisure.

Also see: Dual Sensory Impairment Recreation

Material # 1030.109

This guide is to help students gather information he/she will need, and make decision about the directions his/her life will take. It contains valuable information to help students in their transition planning.

Also see: Children/Sibs

Manuals

Material # 1120.100
This manual was developed to accompany a Usher syndrome workshop by Dr. Sandra Davenport. The manual includes introductory information regarding Usher syndrome as well as important screening information.
Also see: Professional Resource

Material # 1120.101
Topics addressed in this manual include: defining Usher syndrome, looking for signs, common experiences, family issues, school interaction, orientation and mobility, vision assessment and next steps.
Also see: Professional Resource

Material # 1120.102
This manual and accompanying screening forms were written to help school personnel in conducting screenings for Usher syndrome. The manual and forms provide information on what is Usher syndrome, how to conduct a screening, the forms needed for a screening, and state and national resources.
Also see: Professional Resource

Guides

Material # 1130.100
Also see: Parents/Families

Material # 1130.101
This booklet provides basic information on what Usher syndrome is, how to recognize the Syndrome, and simple tests that will help to determine if a person should be referred for medical testing.
Also see: Parents/Families

Videos

Material # 1110.100
This video discusses the conditions of living with RP (Retinitis Pigmentosa) also known as Usher's Syndrome for those who have RP in conjunction with hearing impairments. Work, play, and education of people with RP is demonstrated. Complications in the community (lighting, wall coloring, weather and such...) are discussed. Recommendations are made for assisting individuals with RP for environmental adjustment.
Also see: Dual Sensory Impairment

Material # 1110.101
This video reviews the characteristics of hearing loss and retinitis pigmentosa, strategies and adaptations for working with students with this disability and other similar disabilities, and resource available to support students.
Also see: Professional Resource Parents/Families

Material # 1110.102
This program takes a sensitive look at this degenerative condition, as Oliver Sacks and Danny explore the nature of deaf culture and the marvelous richness of American Sign Language, which includes a sophisticated touch-based variation called tactile signing. 50 minutes.
Also see: Dual Sensory Impairment

Material # 1110.103
Helen Keller National Center (Producer). (n.d.). Mind over matter: Coping with disability [Videotape]. (Available from Helen Keller National Center, 111 Middle Neck Road, Sands Point, NY 11050)
This video focuses on an interview with Winnie Tunison, a deaf-blind woman with Usher's Syndrome. The video discusses the emotional issues faced by a deaf person who loses vision later in life due to this congenital genetic disorder. OPEN CAPTIONED. 28 minutes.

Books

Material # 1200.100
This book was written by four mothers around a kitchen table. Besides being mothers, we are also a developmental psychologist, an occupational therapist, a special educator, and an illustrator. Most of the ideas in the book have been thought of, and made by parents.
Also see: Parents/Families Curriculum Issues

Material # 1200.101
This book is a reference for physical education teachers, adapted physical education specialists, classroom teachers, therapeutic recreation specialists, and parents. It provides 70 ready to use games that people with sensory impairments can play. This book makes it easy to select and modify games and activities for players of all ages and ability levels.
Also see: Parents/Families Professional Resource

Material # 1200.102
This book features more than 60 toys and toy dialogs -- brief conversations during play -- appropriate from birth through age six. New photographs, including a full color inser, show specific toys that families may already own or can easily purchase, as well as others that they can make at home. Chapters on using computers and multimedia are expanded and now include websites for finding the most up-to-date information. The extensive resource section lists dozens of toy companies, related books, and helpful organizations.
Also see: Parents/Families Professional Resource

Manuals

Material # 1220.100
Includes many plans for adapting existing commercial toys through the use of easily constructed home-made devices such as remote control switches and handle extensions which make the toys easier to operate.

**Pamphlets**

**Material # 1480.100**

This pamphlet discusses options and resources for children born with hearing impairments. The focus of the pamphlet is on early intervention and options for communication and technology for children in this age group.

Also see: Early Intervention Augmentative/Alternative

**Books**

**Material # 1400.101**

This book emphasizes the need to create an "auditory world" for children, in which their auditory brain centers continue to develop the neurological and experiential foundations for literacy and learning. Includes the many facets of hearing and hearing impairment, the structure and function of the ear, types and degrees of hearing impairment with special emphasis on otitis media, behavioral and objective (electrophysiological) measurement of hearing, technological management of hearing, and facilitation of listening skills.

Also see: Early Intervention

**Material # 1400.103**

This book is an attempt to synthesize what is currently known about otitis media and its sequelae. It focuses on medical, developmental, and educational considerations.

Also see: n/a

**Material # 1400.104**

The purpose of this text is to provide teachers with comprehensive information regarding how children who are deaf learn to use language in face-to-face communication, reading, and writing.

Also see: Professional Resource

**Material # 1400.107**

This new edition describes the variety of language-development theories and practices used with deaf children without advocating any one theory.

Also see: Professional Resource

**Material # 1400.108**

This book provides an interpretation of central auditory processing disorders that is both scientific and clinical. The information is presented in an easy to read and understand format. This book is ideal for practicing clinicians who are looking for a review of this complex subject.

Also see: Assessment

**Manuals**

**Material # 1420.100**

Use this book to take the guesswork out of treating central auditory processing disorder (CAPD) in school-age through adolescent clients. Gain a clearer understanding of the behavioral effects of CAPD on language and language-dependent performance. Central Auditory Processing Disorder guides speech-language pathologists and teachers (regular or special education) through the process of remediation.

Guides

Material # 1430.101
This booklet is written for parents of children of all ages and all degrees of hearing loss. The information is meant to be an overview, supplemented with a variety of reference and resource materials so you can follow up on subjects more thoroughly.
Also see: Early Intervention, Parents/Families

Videos

Material # 1410.100
This program provides an overview of the anatomy and processes of hearing. Designed to educate hearing parents of deaf or hard-of-hearing children, the video answers some of the most frequently asked questions about audiology. 30 minutes.
Also see: Professional Resource

Material # 1410.101
To date, surprisingly little information is available on the language, life experiences, humor, and history of the deaf culture. This video is an exciting new instructional tool that helps you educate students who are deaf and those who can hear and encourage them to build friendships together. Valuable advice is presented on how to present information of deafness in a positive way, emphasizing areas such as individuality, friendship, and communication. A 150 page workbook is included with the video that facilitates class discussion, activities, and student instructional materials. 16 minutes.
Also see: Inclusion

Material # 1410.102
A detailed exploration of oral deaf education from infancy through adolescence and adulthood, focusing on the critical early years. Includes important information on educational techniques and dramatic technological advances in hearing aids and cochlear implants. CLOSED CAPTIONED. 60 minutes.
Also see: Parents/Families

Material # 1410.103
This important new video provides early childhood education professionals with information that will help them recognize the symptoms of middle ear fluid, meet the educational needs of children who have hearing impairments and foster children's language learning. 18:55 minutes.
Also see: Early Intervention

Material # 1410.104
This program explores the dual purpose of the ears -- hearing and maintaining balance. It illustrates the anatomical structures of the ears, explaining how they sense vibrations in the air and transmit them to the brain, preserving directional information. 25 minutes.
Also see: Parents/Families, Professional Resource

Material # 1410.105
This program explains sound, hearing, hearing loss, and the relationship between listening to speech and different kinds of hearing loss. It includes realistic simulations of what speech sounds like with different kinds of hearing loss and useful hints on improving communication. 17 minutes.
Also see: Professional Resource

Material # 1410.106
National Center for Hearing Assessment and Management (Producer). (1997). Universal newborn hearing screening [Videotape]. (Available from the National Center for Hearing Assessment and Management 1-888-827-0800)
This two-segment video includes information about the importance of early hearing loss identification including testimonials from parents, and information about early otoacoustic emissions screening (OAE). The second segment was designed to be shown to new parents in hospitals about their infant being screen for hearing loss but can also be used by doctors, audiologists, parent advisors, and other medical and education personnel. 20 minutes.
Also see: Early Intervention

Material # 1410.107
Deaf children can learn to speak and this film describes how this extraordinary feat can be accomplished. It is intended for those unfamiliar with oral deaf education, those who may not even be aware that deaf children can learn to speak. CLOSED CAPTIONED. 10 minutes.
Also see: Parents/Families, Early Intervention

Material # 1410.108
Provides a framework for bringing speech to the child rather than the child to the speech. This technique uses age-appropriate, play-oriented experiences to develop a child's speech. Recommended for both parents and professionals. 22 minutes. Has manual.
Also see: Early Intervention

Material # 1410.109
A look at the implications of cochlear implant technology on the Deaf community. Some portray the implants as miraculous assistive devices and others as a baneful attempt by the well-meaning hearing majority to “fix” the Deaf. 9 minutes.
Also see: Parents/Families

Also see: Early Intervention
This video helps parents of young children who are deaf or hard of hearing learn basic hearing aid management skills. Basic concepts and skills related to the management of the child's hearing aids are discussed such as: the anatomy of the ear, hearing tests, the audiogram, identifying parts and functions of the hearing aid, putting aids on the child, giving the hearing aid a daily listening check, establishing full time hearing aid use, and troubleshooting the source of feedback. (Closed Captioned).

Material # 1540.102

This article describes primary outcomes of the development and field-testing of a curriculum promoting learning through active interaction with 27 infants and their caregivers and early interventionists in 2 different states. The curriculum was designed to provide a systematic approach to supporting interactions with infants who have sensory impairments and complex multiple disabilities and who are at the preintentional level of communication. Participating infants had both a visual impairment and hearing loss and additional disabilities.

Also see: Aug/Alternative Comm. Dual Sensory Impairment

Material # 1500.107

This book has two aims. First, to convey what professionals do, the language they use, what influences their decision-making and some of the ramifications of hearing impairment. Second, to convey to professionals what it is like to discover that your child has a hearing impairment and to show what can be learned from parents about the experience of living with a child who does not hear well.

Also see: Hearing Impairment Parents/Families
Manuals

Material # 1520.100

This is the program manual for the Model Demonstration Early Intervention Network (October 1, 1993-February 28, 1997). The project focused on building the capacity of early intervention programs to serve infants and their families. Project goals involved identifying and developing effective early intervention practices with infants and their families.

Guides

Material # 1530.100

Targeted for prelinguistic students of moderate to severe developmental delays, a multisensory approach incorporates systematic language development. 70 topics include reproducible pages, piggy-back songs, and language targets. Information regarding intervention, progress tracking, and expansion ideas are included in this 170 page resource.

Also see: n/a

Videos

Material # 1510.100

Describes how pre-verbal communication develops and the ways caregivers can maintain and support an infant or young child's efforts to communicate. 29 minutes. Has Manual.

Also see: Aug/Alternative Comm.

Material # 1510.101

This illuminating video gives early childhood professionals a first hand look at family-guided activity-based intervention - powerful strategies that enable parents and other caregivers to take advantage of children's natural learning opportunities. 20 minutes.

Also see: n/a

Material # 1510.102

Shows your interdisciplinary team the many areas they need to address - identification, assessment, intervention, and prevention - when working with at-risk infants and toddlers. Leader's and Participant's Guides summarize the videos and provide focus for discussion. 37 minutes.

Also see: Collaborative Teaming

Material # 1510.103

Shows your interdisciplinary team the many areas they need to address - identification, assessment, intervention, and prevention - when working with at-risk infants and toddlers. Leader's and Participant's Guides summarize the videos and provide focus for discussion. 37 minutes.

Also see: Collaborative Teaming

Material # 1510.104

This video presents selected strategies for communicating with infants, toddlers, and preschoolers, whose multiple disabilities include vision and hearing loss. Emphasis is placed on ways to provide information through activities that are natural, meaningful, and motivating. Has manual.

Also see: Aug/Alternative Comm.

Material # 1510.105

This video follows five infants monthly and demonstrates the following aspects of normal visual development: involuntary visual patterns--pupillary reactions, doll's eye responses, and eyelid reflexes; and voluntary eye movements--localization, fixation, ocular pursuit, and gaze shift; as well as eye hand coordination and sensory responses to all modalities. 30 minutes.

Also see: Visual Impairment
This video is intended for early intervention programs. The video provides an introduction to a process for gathering information from parents and for making multiple observations of an infant's responses. Discusses appropriate tests for infants under one year of age, the importance of consistent and appropriate use of corrective lenses when recommended for infants with visual impairment. Aims to promote discussion among early interventionists, families, and optometrists or ophthalmologists. 30 minutes.

### Cultural Diversity

#### Manuals

**Material # 2020.103**

Ideal for training, or for designing your own collaborative program when working with school-age children in ESL, special education, or speech/language programs. Promotes understanding of diversity with the set of activities in the "culture workbook."

Also see: Professional Resource

#### Videos

**Material # 2010.100**

To be used as a resource for educators to assist in addressing the educational needs of learners with cultural differences who may or may not have disabilities. This video provides information for increasing the effectiveness of communication between educators and families of children with cultural differences. This videotape should be used in conjunction with *Culture: Differences? Diversity!* training manual #2020.100.

Also see: n/a

**Material # 2010.101**

This video describes an introduction to the subtleties of working with culturally diverse children and families in early childhood. This video discusses stereotypes and the media, family values, relationship building, communication styles, and language acquisition. Video is accompanied by a booklet that offers questions and activities one can use in leading a group discussion about the video. 60 minutes. Has manual.

Southwest Communication Resources Inc. (Director). (1989). *Finding the balance [Videotape].* (Available from Southwest Communication Resources Inc., PO Box 788, Bernalillo, NM 87004)

This videotape shares the experiences and views of two Indian parents about the diagnosis and treatment of their children with disabilities. One mother of a child with speech and hearing impairments discusses problems she had with the diagnosis of her son's disabilities. The second mother, whose son is diagnosed as having severe/profound hearing impairments, discusses problems relating to her son's doctor. She points out the difficulty in understanding medical terminology and translating medical information in Navajo to extended family members. 23 minutes.

Also see: Professional Resource

**Material # 2010.103**

Southwest Communication Resources Inc. (Director). (1989). *Listen with respect [Videotape].* (Available from Southwest Communication Resources Inc., PO Box 788, Bernalillo, NM 87004)

This videotape provides professionals in the medical field with guidance on providing services to individuals from Native American cultures. An overview of cross cultural barriers experienced by Indian parents when using western medical services is shared. Understanding a culture's customs, beliefs, and background as well as respecting privacy and rights are highlighted as some of the main issues to facilitating communication between service providers and individuals of diverse cultures. 17 minutes.

Also see: Professional Resource

---

**DVD**

**Material # 2015.100**

This DVD and accompanying handbook details issues and strategies that are significant components of culturally sensitive early intervention services. The video highlights the Navajo Nation, but is also applicable to other Native American groups.

Seizure Disorder

Magazines

Material # 2180.100

This special edition is a collection of articles that discuss the prognosis of epilepsy, genetics, the struggle, first aid, and talking about the future. This issue attempts to use common English instead of medical jargon and has a glossary of commonly used terms associated with epilepsy.

Also see: Parents/Families

Videos

Material # 2110.100
Epilepsy Foundation of America. (1990). And life goes on: Severe seizures of early childhood [Videotape]. (Available from Epilepsy Foundation, 4351 Garden City Drive, Landover, MD 20785-7223, (800) 332-1000)

Coping when a child has severe seizure disorder can be especially challenging. "And Life Goes On" explores the emotions and feelings of three families who have learned to adjust and overcome special stresses. The families discuss their feelings, the changes they have made in their lives and resources that can help.

16 minutes.

Also see: Parents/Families

Material # 2110.101
Epilepsy Foundation of America. (1992). Because you are my friend [Videotape]. (Available from Epilepsy Foundation, 4351 Garden City Drive, Landover, MD 20785-7223, (800) 332-1000)

Narrated by a child, this cartoon-like video provides young children with a simple and clear understanding of epilepsy. The video describes seizures, first aid, and the importance of friendship. Slides on tape with narration. 5 minutes.

Also see: Parents/Families

Material # 2110.102
Epilepsy Foundation of America. (1992). Seizure first aid [Videotape]. (Available from Epilepsy Foundation, 4351 Garden City Drive, Landover, MD 20785-7223, (800) 332-1000)

What should I do if someone is having a seizure? This is a question of concern to many individuals. "Seizure First Aid" combines footage of real seizures with re-enactments to demonstrate proper first aid procedures. People with epilepsy talk about how they feel when they have a seizure, discuss how they explain epilepsy to others and how they would like friends, family, and the general public to react when a seizure occurs. 10 minutes.

Also see: Parents/Families

Material # 2110.103
Epilepsy Foundation of America. (1990). Understanding seizure disorders [Videotape]. (Available from Epilepsy Foundation, 4351 Garden City Drive, Landover, MD 20785-7223, (800) 332-1000)

This video provides an explanation of seizure disorders in everyday language. It dispels many misconceptions about epilepsy with medically accurate information; it describes what happens in the brain during a seizure, and it explains why different people experience different symptoms. Actual footage is used. Doctors explain how they use family and patient histories, EEG's and other tests to look for causes and accurately diagnose epilepsy. 11 minutes.

Videos

Material # 2210.100
Blind Children's Center (Producer). (1994). Let's eat: Feeding a child with a visual impairment. (Available from Blind Children's Center, 4120 Marathon Street, Los Angeles, CA 90029)

Provides a variety of techniques to help families teach competent feeding skills to their young children with visual impairments. Has Manual. English and Spanish. 14:54 minutes.

Also see: Parents/Families
This book provides a wealth of information on working with families and their children with disabilities. It includes a disability identification listing, information on teaching self-help skills, and rehabilitation aids. Available in Spanish.

Also see: n/a

Material # 2300.101

This easy to read guide gives educators facts on how students' medical conditions and their treatments directly affect their classroom behavior and learning ability. Readers will get tips and strategies for creating successful learning environments.

Also see: Parents/Families

Material # 2300.102

This book offers practical details on gathering critical information, including tips on what to include, sources, and timelines. It also shows you how to include educational components, accommodations to instruction, medical information, student's communication styles, and positive behavior support plans. The book also includes a section on how to collect personal information about students, as well as sample mapping sessions.

Also see: Parents/Families

Material # 2300.103

*Home Talk* is an assessment tool for parents and care providers of children who are deaf-blind and who have other disabilities. Its purpose is to help you participate in the planning of your child's educational program. *Home Talk* can provide a broad picture of a child's skills, special interests, and personality.

Also see: Parents/Families

Material # 2300.104

This book is aimed at saving precious time and resources by thoroughly translating and explaining legal regulations (i.e., IDEA, ADA, Section 504 of the Rehabilitation Act) so educators can more fully focus on providing the services their students need.

Also see: Materiales en Español n/a

Material # 2300.105

This book features homemade adaptations for children with disabilities for home, school, and play. Simple adaptations will help children who are "differently-abled" achieve similar goals, tasks, and desires of the "abled" child. There are adaptations for mealtimes, bath time, bedtime, and adaptations to help children socialize with peers more efficiently.

Also see: Parents/Families
Material # 2410.103
This video provides insight for the paraprofessional about relating to the regular classroom teacher. In depth coverage surrounds issues related to: 1.) How to be a "teacher supporter," utilizing various communication skills. 2.) How to put communication skills into practice. 3.) Techniques for managing instruction within the "teaching space."
Also see: Inclusion

Material # 2410.104
This video discusses the effective use of interveners with children and youth who are deafblind. Interveners are shown working with individuals who are deafblind in home, school, and community settings. Interviews are presented that give perspectives from parents, teachers, educational administrators, and interveners themselves. 15 minutes.
Also see: Dual Sensory Impairment

Briefing Papers
Material # 2480.100
The purpose of this paper is to provide information about interveners and their role with individuals who are deafblind. It describes the work of interveners in early intervention and educational settings provided under the IFSP and IEP. It aims to clarify terminology, concepts, and address important issues.
