Hearst Foundations support student-driven news production

In 2012, a grant from the Hearst Foundations helped launch the Nevada Media Alliance (NVMA), a student-driven news service within the University’s Reynolds School of Journalism, in partnership with professional media organizations in northern Nevada. Now, additional support from Hearst is expanding the program, rebranded as the Reynolds Media Lab, into a full-scale news production and distribution center.

The increased funding allows the Reynolds Media Lab to expand into Spanish-language news coverage and to explore new broadcast-plans, such as virtual reality video, podcasting and video segments shared over social media. The lab will help more media students gain valuable skills and expose them to a wider variety of career possibilities within the industry.

In addition to providing quality news content to English- and Spanish-speaking populations across Nevada, the opportunities available through the Reynolds Media Lab serve the Reynolds School’s development plans and faculty recruitment efforts. The school is planning to establish the nation’s first undergraduate Spanish-language journalism program, tentatively scheduled to launch in fall 2018, and recently moved toward that goal by hiring another Spanish-language journalism faculty member.

“The Reynolds School is noted for providing students with innovative opportunities for experiential learning,” said Dean Al Stavitsky. “This extended funding from the Hearst Foundations will take these real-world experiences to the next level, as well as enable us to establish bilingual curricula found nowhere else.”

Undergraduate journalism students Krysta Scripter and Jose Olivares work on a piece for Wolf Pack What, a student-run news and entertainment service that uses video and virtual reality to tell stories about life on campus. Thanks to increased support from the Hearst Foundations, students will have more opportunities to produce and distribute multimedia stories in Spanish and English through the Reynolds Media Lab.

To learn more about the Reynolds Media Lab, please contact Laurice Antoun-Becker, associate director of development, (775) 784-4184 or lantounbecker@unr.edu.
Stephen R. Davis supports Special Collections

by CURTIS VICKERS ’07 M.A.

After retiring as assistant director at Nevada Humanities in 2012, historian and photographer Stephen R. Davis donated his entire photographic archive to the University of Nevada, Reno’s Special Collections. The Stephen R. Davis Photo Collection documents the history of the Great Basin’s deserts and mountains, and the people who inhabit them. Davis’s work includes the projects “Childhood Memory and Sense of Place in Northern Nevada”; “Stories from the Front Lines: Portraits and Stories about the Lives of Cancer Patients, their Families, and Caregivers”; and “Nevada in Time: Photographs of a Changing Landscape.”

Now, Davis has made provisions in his estate plans to support Special Collections in preserving, organizing and exhibiting his work. The gift ensures that his archive remains available in perpetuity to scholars studying the history of Nevada.

“Dr. Davis’s exceptional photography is an incredible asset for the University,” Kathy Ray, dean of the University Libraries, said. “His work exploring the changing nature of our Nevada landscape adds to the growing corpus of scholarship gathered in Special Collections that is of critical importance to researchers and scholars. In establishing a provision in his estate plans for the continued upkeep of his catalog, Dr. Davis’s generosity has ensured that his phenomenal work will inspire viewers and scholars for generations.”

Even as his photography advances scholarship, knowing that Special Collections will continue to care for his catalog has become a source of encouragement for Dr. Davis: “I’m very pleased that my work is being preserved, and it is a great motivation for me to keep working.”

To learn more about supporting Special Collections, please contact Millie Mitchell, director of development, (775) 682-5682 or mimitchell@unr.edu.
Merrily Kronberg-Graham ’72 (geography), ’75 M.S. (geology) and her husband Douglas Graham are creating a scholarship endowment for graduate students who mentor undergraduates in the Mackay School of Earth Sciences and Engineering.

Now a member of the Mackay Executive Advisory Board, Kronberg-Graham received outstanding mentorship from graduate students during her undergraduate years—mentorship that she now hopes to encourage through the Douglas and Merrily Kronberg-Graham Graduate Mentor Endowed Scholarship. Beyond offering valuable help with logistics and course material, her graduate mentors gave her a thorough sense of what graduate study entailed. Armed with this knowledge, she was able to make an informed decision about when to go back to school.

Kronberg-Graham’s graduate studies led to an internship with the State of Nevada, and she eventually became the state’s first flood plain manager. Career success aside, perhaps the biggest gain from her graduate education was a personal one: Merrily met her husband, Doug, after his property flooded in 1980.

“My decision to pursue graduate study, and from there the whole trajectory of my life and career, was fundamentally influenced by the graduate students who encouraged me when I was an undergraduate,” says Kronberg-Graham. “That relationship can be so powerful and important. I want to encourage a culture of mentorship in the Mackay School.”

Mackay School Director Russell Fields agrees. “For our undergraduates, being mentored by someone who can introduce the joys and challenges of graduate study can really open their eyes,” he said. “Someone close to their age, whom they see as more of a peer than their instructors, can make graduate school feel accessible, and that opens up a lot of options.”
For 60 years, the University’s Orvis School of Nursing has been educating aspiring nurses to provide outstanding health care to the citizens of Nevada. From an original gift to found the school to continued annual operating support, Arthur and Mae Orvis, and later the foundation that bears their names, have been the school’s champions every step of the way.

Founded in 1956 and opened in 1957, the Orvis School of Nursing is the oldest nursing school in Nevada. It offers a total of three degrees (BSN, MSN and DNP) at the undergraduate and graduate levels with six different graduate-level specializations, and graduates 150 to 160 students each year. Orvis students are noted for their rigorous academic performance: In 2016, Orvis graduates boasted a 93 percent pass rate on the NCLEX (the national examination for registered nurses), compared to the national average of 84 percent.

“The Arthur and Mae Orvis Foundation has been exceptionally instrumental in the growth of our programs and development of our faculty,” said Orvis School of Nursing Dean Patsy Ruchala. “Sixty years ago, when the state was in critical need of a nursing school, Arthur and Mae Orvis responded to that need. The Arthur and Mae Orvis Foundation continues to support the vision for nursing education inspired by Mr. and Mrs. Orvis. Today, whether we need resources to recruit and develop faculty, technology to keep our students up-to-date or support for a community outreach initiative, the Arthur and Mae Orvis Foundation is there. They are outstanding partners in our quest to improve health care in Nevada.”

To learn more about supporting the Orvis School of Nursing, please contact Kara Mays, assistant director of development, (775) 682-8567 or karamays@unr.edu.
Scholarship Endowment honors the late Henry Malin Prupas, M.D., ’71, ’73

A renowned specialist in the treatment of arthritis and an associate clinical professor at the University of Nevada, Reno School of Medicine, the late Henry Malin Prupas ’71 (premedical), of the two-year Class of 1973, dedicated more than 40 years of his life to helping his patients and students. In his honor, the Henry Malin Prupas, M.D. Medical Student Scholarship Endowment has been established with gifts from his wife, Barbara Prupas ’86, and additional memorial gifts.

To learn more about supporting students in the School of Medicine or to make a memorial gift in honor of Dr. Prupas, please contact Seema Donahoe ’02, director of development, at sdonahoe@unr.edu or (775) 682-7304.
A scholarship endowment for students of environmental sciences and conservation has been established to honor the late Marjorie “Marge” L. Sill ’69 M.A. (English), along with a fund to support the work of Special Collections to process and care for her extensive archives. Marge was a longtime environmental activist known as the “Mother of Nevada Wilderness.”

Born in Bakersfield, Calif., Marge became active in environmental issues in her home state and continued her activism when she moved to Reno with her husband in 1959. She was a founding member of Friends of Nevada Wilderness and served on the board for 32 consecutive years. She fought tirelessly for the passage of the Wilderness Act of 1964, which created a legal definition of wilderness in the United States. She was instrumental in the creation of Great Basin National Park in 1986 and in the passage of the Nevada Wilderness Protection Act in 1989. Marge’s advocacy continued nearly until the day she passed away in October 2016. But Marge’s greatest legacy may be the impact of her infectious enthusiasm and reverence for Nevada’s wild places on others. Throughout her decades of advocacy, one of her greatest joys was introducing new people to the beauty of Nevada.

“The majesty of our state depends on the willingness of its citizens to protect and conserve its natural wonders,” said Vice President of Development and Alumni Relations John Carothers. “Marge Sill led that charge. We are grateful that her friends have stepped forward to honor her legacy and to ensure that the values she upheld are passed on to future generations.”

The scholarship endowment in Marge’s honor was established by her friend, David von Seggern, faculty emeritus in the Nevada Seismological Laboratory. Additionally, friends and colleagues established the fund in Special Collections to catalogue Marge’s papers for future generations to reference and enjoy. The lead gift was provided by University Foundation Professor Emerita Ann Ronald.

To contribute to the Marjorie L. Sill Memorial Scholarship Endowment, please contact Ralph Phillips, director of development, (775) 784-4390 or rphillips@unr.edu. To contribute to the Special Collections Marge Sill Archives project, please contact Millie Mitchell, director of development, (775) 682-5682 or mimitchell@unr.edu.
Jim Riley ’69 endows scholarship for single parents

by JOANNA TRIEGER

University alumnus Jim Riley ’69 (journalism) has established an endowed scholarship in honor of his late parents, LaRie and Abe Riley. Recipients of the scholarship will be students in the College of Business. The first award will be made for the 2017-18 academic year.

Natives of Carson City, Nev., and Teague, Texas, respectively, Abe and LaRie Riley married in Reno in 1941. They opened their own insurance agency, Evans-Riley Insurance, in 1957. Unfortunately, Abe passed away suddenly on New Year’s Eve 1958, and LaRie found herself running the business while raising the couple’s young son, Jim, on her own.

Hoping to further her education, LaRie sold the agency and began taking classes at the University’s College of Business. While she eventually had to leave the college to support herself and Jim, she valued the experience highly. Jim hopes that the scholarship in his parents’ honor will assist those who are pursuing education to care for their families.

“The College of Business helps students develop personally and professionally in their careers, but it can be challenging for single parents to take advantage of those opportunities while also devoting considerable time to their many other obligations,” said Greg Mosier, dean of the College of Business. “Scholarships like this can bridge the gap and make a real difference for those who need it.”

In addition to this scholarship, Jim Riley established a scholarship endowment in honor of his late godparents, Urdene and Jim Slingerland, to benefit deserving University students in any major.

To learn more about establishing an endowed scholarship for students in the College of Business, please contact Mitch Klaich ’02, director of development, (775) 682-6490 or mklaich@unr.edu.
Young alumnus pays education forward

by JOANNA TRIEGER

For an increasing number of young alumni, giving back to their alma mater is a natural step once they’ve established themselves in their careers. One such Nevada alumnus is Matthew Wolden ’03 (health ecology), ’05 MPH, who recently created the Matthew R. Wolden, MPH School of Community Health Sciences Scholarship to assist future professionals in his field.

Wolden, a former ASUN president, focused on health care leadership and public health during his time as a graduate student. He then dove into his career, earning positions at UCSF Medical Center, New York Presbyterian Hospital and Stanford Children’s Health before settling into his current role as an executive director at UCSF Health.

“I had an outstanding experience as a health sciences student at Nevada, and I’ve been able to take advantage of some great career opportunities because of my training,” Wolden said. “This career is extremely rewarding, both in terms of personal fulfillment and in the joy of helping to improve the lives of others. I want to help give today’s students access to the same opportunities I had at the University of Nevada. I hope that this scholarship will help the next generation of students, especially those from disadvantaged backgrounds, as the perspective they could provide would be an asset in our field.”

Lauro Solomo II, a sophomore majoring in community health sciences, received the scholarship this year. “I plan to use this knowledge to improve the lives and health of people in need,” wrote Solomo in a letter to Wolden. “Thank you again for giving me the opportunity and help to accomplish my goals in life, and thank you for giving back to the Nevada community.”

Matthew R. Wolden ’03, ’05 MPH recently established a scholarship for students of community health sciences.

To learn more about supporting students in the Division of Health Sciences, please contact Kara Mays, assistant director of development, (775) 682-8567 or karamays@unr.edu.
The community-led project is further supported by thousands of Wolf Pack fans who have purchased personalized bricks to leave their legacy in a stadium that has provided countless memories over the years. More than 60 percent of Wolf Pack fans enter the stadium on gameday through the north entrance. Jensen Plaza comes complete with new ticketing facilities and concession/merchandising opportunities to better accommodate fans during Nevada games.

To learn more about supporting the Donald L. Jensen Plaza project, please contact Assistant Athletic Director, Development Zack Madonick, (775) 682-6977 or mmadonick@unr.edu.
The Nevada Alumni Council is now accepting new member nominations!

**DEADLINE: AUGUST 1, 2017**—The Nevada Alumni Council is the governing body of the Nevada Alumni Association and meets throughout the year. For more information or to nominate yourself or someone you know, please visit [unr.edu/alumni/nevada-alumni-council/nominate](http://unr.edu/alumni/nevada-alumni-council/nominate), or fax this form to (775) 784-4878.

*OR* mail the form below to: Nevada Alumni Association, Morrill Hall Alumni Center, University of Nevada, Reno/0164, Reno, Nevada 89557-0164.

The Jones Family Foundation: A tradition of philanthropy

by JOANNA TRIEGER

Charlotte McConnell and Ann Carlson ’59 (business), ’78 M.Ed. celebrated the induction of the Clarence & Martha Jones Family Foundation into the Honor Court at the Founder level in June 2016. Founded by Charlotte and Ann’s parents, Clarence Jones ’31 (electrical engineering) and Martha (Hansen) Jones (attended 1929-31), the Jones Family Foundation has long been a strong supporter of academic programs and capital projects around the University, including the William N. Pennington Student Achievement Center, the planned University Arts Building, renovations to the Fleischmann Planetarium, the Dean’s Future Scholars Program and NevadaFIT. Most recently, the Foundation pledged its support of the proposed new engineering building (see Page 71).

In addition to serving as trustees of the Jones Family Foundation, Ann and Charlotte have both personally supported the University in ways that are meaningful to them, backing scholarships and programs in the College of Education (Ann) and the College of Engineering (Charlotte). Both are champions of Wolf Pack Athletics, and their generosity has been felt by student-athletes and fans alike for decades.

Support from organizations like the Clarence & Martha Jones Family Foundation, and from individuals like Ann and Charlotte, is absolutely critical as the University strives to build inspiring facilities, to develop programs that challenge students and assist our community, and to conduct research that moves the needle for Nevada, the nation and the world. We are grateful for their outstanding generosity and for the generosity of each and every donor on these pages. Together, we are creating a Nevada of which we can all be proud.
Planned Giving Advisory Council helps secure Nevada’s future

The Planned Giving Advisory Council helps connect the University to community members who want to make a difference through planned gifts. At its Jan. 25 meeting, the PGAC was given a tour of the University of Nevada, Reno Innovation Center – Powered By Switch, a collaborative space designed to stimulate the creation and incubation of start-ups. Front row, left to right: Lynda Mahorter, Leslie Daane ’89, 2017 Chair Sandra Wilson, Greg Yup ’85, Julie Callahan ’89. Back row, left to right: Ron Zideck ’59, McClure Wallace ’03, Darcy Houghton, Mark Quinlan ’78, Tom Rafferty ’98, Bill Creekbaum ’95 MBA, Chris Mackenzie ’90, Sarah Bailey, Mike Aurnague ’89, Tammy Love ’02 M.Acc., Scott Albright ’09 M.S., Jason Morris, Mike Rooker ’89, Director of Development Brian Saeman ’98, Director of Planned Giving Lisa Riley.

The Office of Planned Giving recently launched a new website: unrlegacy.org. Curated by Lisa Riley, director of planned giving, and Brian Saeman ’98, director of development, the website provides in-depth information on the benefits of planned gifts, sample bequest language, and calculators designed to help users determine valuations. The website also provides an up-to-date listing of current and emeriti Planned Giving Advisory Council members.

As always, if you cannot find the answer you want on the website, please feel free to contact Lisa at l Riley@unr.edu or (775) 682-6017 or Brian at bs aeman@unr.edu or (775) 682-5938.

The University of Nevada, Reno Foundation’s Planned Giving Advisory Council is comprised of some of the best and most highly regarded professionals in northern Nevada. The volunteer council, which includes accountants, attorneys, financial planners and others in fields related to planned giving, meets quarterly to learn about University projects, programs and initiatives that may be of interest to their clients as they make decisions about wealth management and estate planning. With this knowledge, council members serve as ambassadors to the greater community and work to increase community engagement with the University.

Planned Giving Advisory Council Chair Sandra O. Wilson obtained her bachelor’s and master’s in education at Stanford and her law degree at the University of San Francisco. Nonetheless, she is a longtime Nevadan and supporter of the University of Nevada, Reno. Of the role the PGAC plays in the community as ambassadors of the University, she says, “We, as members of the Planned Giving Council, are a diverse group of business, legal, accounting, trust and other professional advisors and this diversity helps expand the variety of community members we each reach. I, for example, am not an alumna of the University and bring a different perspective to the process of communicating the University’s achievements, plans, dreams and excitement to the larger supporting community. As council members and with our families, friends and clients, we enjoy the chance to spread the University of Nevada, Reno story.”

by CURTIS VICKERS ’07 M.A.
A new engineering building is planned for campus, and construction could start as early as fall 2018. The University has received widespread community support for the building, a critical addition to the campus’s engineering complex. Governor Brian Sandoval ’86 (English) provided for the building in the biennial budget released earlier this year and $23 million in private philanthropy has been garnered for the project. University funds and private donations comprise more than half of the $87.8 million projected cost of the building, which is pending legislative approval.

The University’s College of Engineering has seen enrollment nearly double in the last 10 years. Area businesses, along with businesses throughout the state and nation, are anxious to hire qualified engineering graduates, like the 262 who received bachelor’s, master’s and doctoral degrees in engineering from Nevada last year. The University is meeting these demands by hiring more engineering faculty to teach students, to conduct important research and to partner with local industry to meet critical needs. The new engineering building, as proposed at 87,000 square feet, will provide state-of-the-art research laboratory, teaching and office space and a 200-seat classroom.

“We are gratified by the generous support we have received from individuals, businesses and foundations at this early stage of the project,” says Manos Maragakis, dean of the College of Engineering. “We still have work ahead of us to bring the building to fruition, but it is absolutely time to expand the space available for our faculty, students and community partners to learn, to conduct research and to innovate.”

To learn more about supporting the planned new engineering building on campus, please contact Flynn Ginty, director of development, at (775) 682-7696 or fginty@unr.edu.

The following individuals and organizations have provided leadership support for the proposed engineering building:

Bretzlaff Foundation
Clarence & Martha Jones Family Foundation
Nell J. Redfield Foundation
Barrick Gold Corporation
Charles H. Clipper Family Trust
Educational Pathways International

Stuart Feigin
Gardner Family
Roxie & Azad Joseph Foundation
The Robert S. & Dorothy J. Keyser Foundation
Mallory Foundation
NV Energy
Richard ’66, ’71 M.S. and Assunta Natucci Reynolds ’66

Jeff ’76 and Rhonda Ceccarelli ’83, ’93 M.A.
EBARA International
Krater Consulting Group, PC
Dick and Charlotte McConnell
Q & D Construction
William Rose ’62, ’65 M.S.
As nearly two inches of rain fell on Reno Jan. 9, the entire region watched with bated breath to see if the Truckee River would flood. National Weather Service forecasts harkened back to historic flood years like 2005 and 1997, the latter of which caused an estimated $600 million in damage to downtown Reno. Many hunkered down and watched the rising Truckee with trepidation from a camera mounted on Arlington Avenue.

That camera is part of the AlertTahoe program, a wirelessly connected camera system that is designed primarily to help detect nascent wildfires and give first responders an edge in protecting wilderness and saving lives. An initiative of the Nevada Seismological Laboratory, the Mackay School of Earth Sciences and Engineering and community partners like the Tahoe Prosperity Center, AlertTahoe features 30 strategically placed cameras (one of which was temporarily moved to Arlington during the January flooding) that, in the past three years, have been instrumental in fighting more than 25 wildfires.

“It is important for everyone on campus to turn our research into tangible benefits for our community,” Russell Fields, director of the Mackay School, an AlertTahoe partner, said. “Through technological advances originating in work performed by our faculty and staff, we were able to develop the wireless microwave sensor technology that fuels the AlertTahoe system. And with the support of the Tahoe Prosperity Center, we have been able to put that system to good use, protecting land and lives.”

Citing the devastating and costly ($160 million in damage) 2007 Angora fire as an example of the kind of destruction that AlertTahoe can help prevent, the Tahoe Prosperity Center, a regional economic and community development organization, has taken the lead in supporting the AlertTahoe system as part of its goal of ensuring a sustainable and healthy Lake Tahoe Basin.

To learn more about supporting the AlertTahoe system, contact Donna Knotek ’12, ’15 MBA, director of development, (775) 682-5952 or dknotek@unr.edu, or Stefanie Givens, associate director of development, (775) 682-8791 or sgivens@unr.edu.

To learn more about the AlertTahoe system (and to view live feeds of its cameras), visit http://alerttahoe.seismo.unr.edu.
William N. Pennington Foundation supports Nevada middle and high school instruction

The William N. Pennington Foundation recently made a gift to ensure that NevadaTeach continues to train students to excel in the STEM fields and in the classroom.

The University launched NevadaTeach in fall 2015. An educational program that connects Master Teachers in middle and high schools with college students majoring in science, technology, engineering and mathematics (STEM) fields, NevadaTeach is designed to provide college students with the skills and qualifications necessary to become teachers immediately after graduating. Participants who go on to teach in Nevada’s middle and high schools have the depth of knowledge gained through majoring in a STEM field and exceptional instruction from experienced teachers in effective pedagogy. NevadaTeach currently employs three Master Teachers who work with 122 students preparing for careers in education.

“The NevadaTeach program is an important part of our ongoing commitment to ensuring Nevada students receive the best education possible from instructors who are not only experts in their subjects but trained by successful teachers to inspire students in the classroom,” Kenneth Coll, dean of the College of Education, said. “The William N. Pennington Foundation’s support of NevadaTeach strengthens our community by nurturing the teachers who will go on to mentor thousands in their teaching careers.”

Gifts from the William N. Pennington Foundation to NevadaTeach will be used to launch a renovation project in the William Raggio Education Building that will create a physical home for the program. The space will include a dedicated reception area, a student work room, a classroom laboratory, a conference room, six Master Teacher offices, storage space and a director’s office. The spaces will not only centralize NevadaTeach resources but will also facilitate collaboration among NevadaTeach students and their Master Teachers.

In more than 25 years of philanthropy, the William N. Pennington Foundation has given to programs, scholarships and building projects across campus, supporting excellence in the full range of intellectual endeavors.

To learn more about supporting NevadaTeach, contact Kristen Kennedy ’98, director of development, (775) 784-6873 or kristenk@unr.edu.
Some attend Wolf Pack athletic events for the epic rivalries; others are there for food and friends. But for many, the highlight of a Nevada sporting event is the Wolf Pack Marching Band, aptly named the “Pride of the Sierra.”

The Marching Band is made up of 190 students from all academic disciplines and personal backgrounds, making it one of the most diverse groups on campus. Between home and away athletics performances and special events, the band gives over 70 performances each year. Beyond pure technical skill, the group’s rigorous practice and performance schedule instills a strong work ethic and a sense of pride, ownership and community in its members.

The band may bring the fun to the games, but community partners, like Greater Nevada Credit Union, bring the funds to the band. GNCU has been one of the group’s biggest supporters for five years and matches community donations, dollar for dollar, up to $25,000 per year. This partnership has been critical to the Marching Band’s success, funding student scholarships, new uniforms, upgraded instruments and equipment, increased instructional staff and unique travel opportunities that define many students’ band experience. With support from GNCU, the band performs at community events throughout the year, including Special Olympics Nevada’s bowling tournament and Polar Plunge fundraiser.

“"The Wolf Pack Marching Band is one of the most beloved ways that we connect to the community, and it is so wonderful to see community partners like GNCU responding with enthusiastic support,” said College of Liberal Arts Dean Debra Moddelmog. “Their generosity allows us to make this an exceptionally educational — and rewarding — experience for our hardworking students.”

Member-owned Greater Nevada Credit Union is a not-for-profit, full-service financial institution that has been helping Nevadans since 1949. Their philanthropy at the University extends beyond the Marching Band with gifts to scholarships, programs and KUNR radio.

To learn more about supporting the Wolf Pack Marching Band in the College of Liberal Arts, please contact Stuart Golder ’91, ’98 M.A., director of development, at (775) 784-1222 or sgolder@unr.edu.
